## Overview

SoftPro Live Web Order Entry gives providers of SPLive the ability to retrieve their customer’s order requests and seamlessly accept the order data into ProForm. Providers of SPLive needed the ability to streamline the process of end users placing orders on the web, especially for those submitting basic information.

Customizable Web Order Entry Benefits
• Ability for administrators to control what is displayed on the web order entry form for sections, fields and dropdown values
• New fields on the WOE form
• Contacts section with ability to add all contact types supported in SoftPro
• Grid views of parties and contacts being submitted with the order
• Ability for providers to filter submitted web orders by profile in the 360 queue when multiple profiles exist
• Ability for providers to receive email notifications by profile when multiple profiles exist
• Additional roles added in Account Settings
• Ability Cancel Button on Web Order Entry Form

## Glossary

Role/Term	Description
SPLive End User	Registered SPLive user with access to Web Order Entry. Typically third party entities such as Lenders or Selling Agents
WOE Form	Web Order Entry Form – used by end users to place orders from the SPLive website
SPLive Administrator	Registered SPLive user with administrative privileges who setup customer profiles. These are typically administrators for the Provider
Custom Form Editor	Form used by Administrators to modify the layout of the WOE Form

SPLive Provider	Entity providing SPLive service – this is typically a Title and Escrow Company who consume SoftPro to conduct business with end users
SPS	SoftPro Select
Office	Also described as “Branch” or “Profile”. A Provider can have several offices and will setup a separate profile in Administration for each office.

## Account Settings

The logged in user has the ability to update their account information by opening Account Settings located under their email address (see figure 1.4 below).

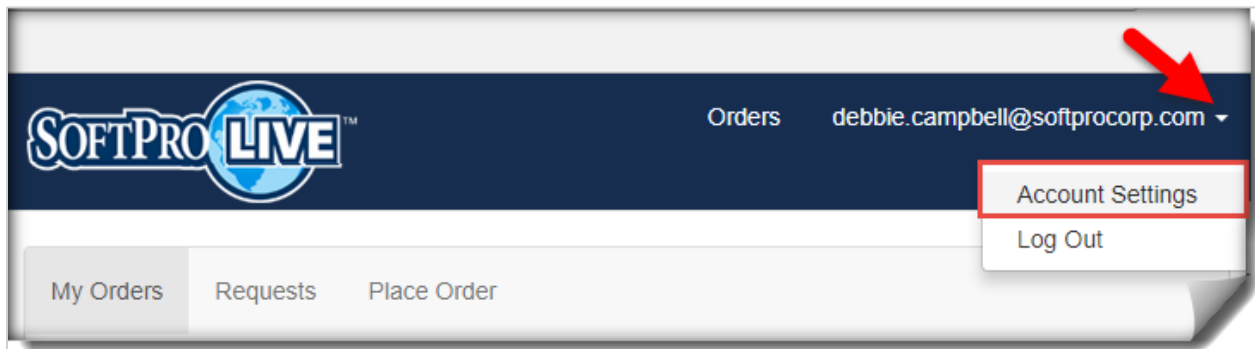

Figure 1.4: Account Settings

## Roles

Previously, the logged in user had the following roles available: Lender, Mortgage Broker and Realtor. In this release, they now have the ability to choose: Abstractor, Attorney Representing Buyer, Attorney Representing Seller, Attorney Representing Lender, Escrow Company, Mortgage Broker, Lender, Listing Agent, Selling Agent, Settlement Agent, Title Company, or Other – see figure 1.5.

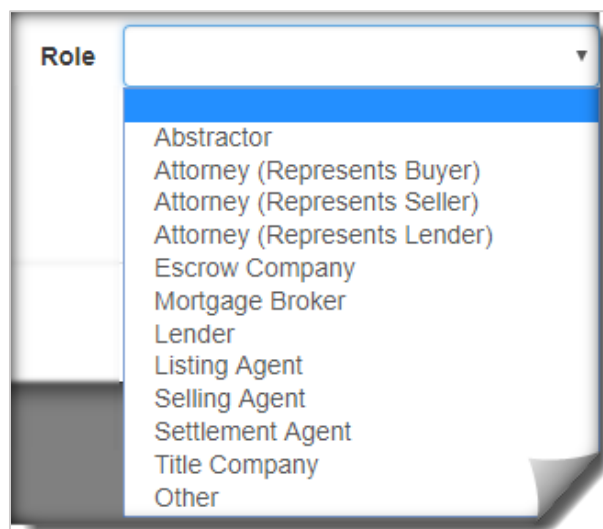

Figure 1.5: Roles

## Web Order Entry Form *(Updated)*

---

SPLive users with rights to WOE have immediate access to the updated WOE form. Each section and field is outlined in this document. If sections or fields described below are not displayed on the WOE form then the Administrator has configured the form to hide certain sections and fields (see [Administrators](#) section). Unless otherwise noted in this document, the administrator can make fields required or choose to hide the field.

## How to Place an Order

---

How to place an order in this release is the same as previous releases. Once the Administrator has provided the end user with login information and WOE rights they should be able to view the WOE form with the following steps:

1. Log into SPLive using credentials provided by your Administrator.
2. Click 'Place Order'.
3. Web Order Entry Form is displayed to enter order information – see figure 1.1.
  - a. Contacts section
  - b. Payoffs section
4. Click Cancel or Submit Order – see figures 1.2 & 1.3
  - a. After clicking Submit an order submission confirmation message appears, click Continue
  - b. Cancel button will cancel the order and revert back to My Orders page (previously the user had a 'Reset' button which cleared entered text on the form).
5. SoftPro Live 'Requests' page is displayed after submitted an order – see figure 1.4.
  - a. NOTE: This page shows a list of submitted orders from the logged in user to the Provider only. To see the list of orders accepted/published from the Provider to SPLive then go to 'My Orders' page tab.

## Transaction Information

Figure 2.0 - Transaction Information Section

Transaction Information Section		
Ref#	Field	Description
<a href="#">1</a>	Provider	Dropdown values pull from the customer association(s) with the login user's account in Administration (single customer is selected by default). If multiple customer associations exist then each provider is displayed in the dropdown. The administrator can make this field hidden but cannot make it optional as it is system required field. <u>Provider Selection dialog</u> : If multiple customer associations exists then this dialog will appear as soon as the user clicks "Place Order" see figure 2.1 above.
<a href="#">2</a>	Transaction Type	Dropdown values pull from the custom form editor. The administrator cannot make this field or optional as it is a system required field. However, the administrator can modify what transaction types are displayed in the dropdown.
<a href="#">3</a>	Office	Dropdown values pull from the office name field entered on the customer profile in Administration. If a customer has more than one profile association then the office name for each profile is displayed in the dropdown.
<a href="#">4</a>	Order Type	Dropdown values pull from the custom form editor. The administrator can modify what types are displayed in the dropdown and make this field hidden or required.
<a href="#">5</a>	Loan Number	Enter a loan number.

Transaction Information Section		
<a href="#">6</a>	Sales Price	Enter a sales price. Note: Sales Price field will disable when the transaction type is Refinance or equity.
<a href="#">7</a>	Project Name	Enter a project name.
<a href="#">8</a>	Loan Amount	Enter a loan amount.
<a href="#">9</a>	Est. Sett Date	Enter an estimated settlement date. The administrator can make this required or field hidden.
<a href="#">10</a>	2 <sup>nd</sup> Loan Amount	Enter a 2 <sup>nd</sup> loan amount. NOTE: This field is hidden by default, so the Administrator will have to make it shown on the custom form editor and re-publish. The administrator can also make field required.
<a href="#">11</a>	Your Role	Pulls from login user's <a href="#">Account Settings</a> once a Transaction Type is selected. The administrator can make this required or field hidden and also modify what types of roles are displayed in the dropdown. Once selected the role type is defaulted into the contacts but users can manually update Your Role to a different contact . NOTE: If Admin chooses to hide Role the role type is not defaulted into contacts but the email address of the submitter is preserved in the order notes once accepted into ProForm.
<a href="#">12</a>	Marketing Rep	Enter the name of the Marketing Representative. The administrator can make this required or field hidden. Note: This field was previously labeled Sales Representative.
<a href="#">13</a>	Settlement Services	Dropdown values pull from the custom form editor. The administrator can modify values displayed in the dropdown. NOTE: This field is hidden by default, so the Administrator will have to make it shown on the custom form editor and re-publish. The administrator can also make field required.
<a href="#">14</a>	Reverse Mortgage	Dropdown values pull from the custom form editor. The administrator can modify values displayed in the dropdown. NOTE: This field is hidden by default, so the Administrator will have to make it shown on the custom form editor and re-publish. The administrator can also make field required.
<a href="#">15</a>	Order Subordination	Dropdown values pull from the custom form editor. The administrator can modify values displayed in the dropdown. NOTE: This field is hidden by default, so the Administrator will have to make it shown on the custom form editor and re-publish. The administrator can also make field required.
<a href="#">16</a>	Existing Mortgage Being Assigned	Dropdown values pull from the custom form editor. The administrator can modify values displayed in the dropdown. NOTE: This field is hidden by default, so the Administrator will have to make it shown on the custom form editor and re-publish. The administrator can also make field required.
<a href="#">17</a>	Municipal Searches Required	Dropdown values pull from the custom form editor. The administrator can modify values displayed in the dropdown. NOTE: This field is hidden by default, so the Administrator will have to make it shown on the custom form editor and re-publish. The administrator can also make field required.
<a href="#">18</a>	Survey Instructions	Dropdown values pull from the custom form editor. The administrator can modify values displayed in the dropdown. NOTE: This field is hidden by default, so the Administrator will have to make it shown on the custom form editor and re-publish. The administrator can also make field required.

## Property Information

The screenshot shows a 'Property Information' form with the following fields and callouts:

- 1: Property Type (dropdown menu)
- 2: Address (text input)
- 3: Zip Code (text input)
- 4: City (text input)
- 5: State (dropdown menu)
- 6: County (dropdown menu)
- 7: Lot (text input)
- 8: Block (text input)
- 9: Section (text input)
- 10: District (text input)
- 11: APN / PID (text input)
- 12: Tax Map ID (text input)
- 13: Tract (text input)
- 14: Subdivision (text input)
- 15: Brief Legal (text input)

Figure 3.0 - Property Information Section

Property Information Section		
Ref#	Field	Description
<a href="#">1</a>	Property Type	Dropdown values pull from the custom form editor. The administrator can make this field hidden or required and also modify what types are displayed in the dropdown.
<a href="#">2</a>	Address	Enter an address.
<a href="#">3</a>	Zip Code	Enter a zip code.
<a href="#">4</a>	City	Enter a city or value will default once zip code is entered.
<a href="#">5</a>	State	Enter a state or value will default once zip code is entered.
<a href="#">6</a>	County	Enter a county or value will default once zip code is entered.
<a href="#">7</a>	Lot	Enter a lot or unit number of the property.
<a href="#">8</a>	Block	Enter the block that identifies the property.
<a href="#">9</a>	Section	Enter the section that identifies the property.
<a href="#">10</a>	District	Enter the district where the property is located.
<a href="#">11</a>	APN/PID	Enter an assessor parcel number or parcel ID. NOTE: Previously label was "PIN/APN" and was combined with Tax Map ID
<a href="#">12</a>	Tax Map ID	Enter a tax map ID. NOTE: Previously Tax Map ID was combined with PIN/APN
<a href="#">13</a>	Tract	Enter a tract.
<a href="#">14</a>	Subdivision	Enter a subdivision name.
<a href="#">15</a>	Brief Legal	Enter a brief legal description.

## Municipal Searches *(New)*

Municipal Searches is displayed on the Web Order Entry form once Administrators have shown this new section and fields from the custom form editor and publishes to end users. NOTE: Fields are specific to New York Documents and require NY packages to be installed for these fields to be mapped correctly. Otherwise, fields will be written to order notes.

<a href="#">9</a>	Phone	Enter a valid phone number.
<a href="#">10</a>	Mobile	Enter a valid mobile phone number.
<a href="#">11</a>	Email	Enter a valid email address.
<a href="#">12</a>	Fax	Enter a fax number.
<a href="#">13</a>	Add button	Click to add the contact to the contacts grid. Note: Add button will disable if any of the contact fields are required and empty or if fields contain invalid data (e.g. invalid phone number).
<a href="#">14</a>	Contacts Grid (Figure 5.1)	View of contacts being submitted with order. Note: a contact will default into the first row of grid when a value in 'Your Role' is selected in <a href="#">Transaction Information section</a> . <ol style="list-style-type: none"> <li>1. <u>Edit</u> - Click [Edit] to make changes to the contact information.</li> <li>2. <u>Delete</u> - Click [Delete] to delete the party from the parties grid. Note: the delete button will not be enabled if a user is actively editing a party.</li> <li>3. <u>Save</u> - Click [Save] to commit changes for edited values.</li> </ol>
<a href="#">15</a>	Lender Proposed Insured Clause	(Lender Contact Type Only) Enter the Proposed Insured Clause to indicate how the Lender name should appear on legal documents. NOTE: This field is hidden by default, so the Administrator will have to make it shown on the custom form editor and re-publish (see <a href="#">figure 16.1</a> in Admin section below). The administrator can also make field required.

## Payoffs

The screenshot shows a form with three rows of input fields. Each row contains three fields: 'Lender Name', 'Loan Number', and 'Payoff Amount'. The 'Payoff Amount' field includes a dollar sign (\$) and a numeric input area. The first row has three blue circular callouts with numbers 1, 2, and 3, pointing to the Lender Name, Loan Number, and Payoff Amount fields respectively.

Figure 6.0 - Payoffs Section

Payoffs Section		
Ref#	Field	Description
<u>1</u>	Lender Name	Enter the Lender Name.
<u>2</u>	Loan Number	Enter the Loan Number.
<u>3</u>	Payoff Amount	Enter the Payoff Amount.

## Notes and Attachments

The screenshot shows a form with two main sections. On the left is a 'Notes' section with a large text area. On the right is a 'Files' section with a 'Choose Files' button and the text 'No file chosen'.

Figure 7.0 - Notes and Attachments Section

Notes and Attachments Section		
Ref#	Field	Description
<u>1</u>	Notes	Enter any notes to be submitted with order.
<u>2</u>	Files	Attach a file to the order. NOTE: A validation will appear if the file type is not supported.

## Custom Form Editor - Administrators

SoftPro Live Administrators have the option to customize the layout of the WOE form (ONE CUSTOMIZED FORM PER SERIAL NUMBER). Updates can be saved as a draft to be published at a later time or can be published immediately to their ends users on the web.

The WOE form is available out of the box to all SPLive users without any additional setup by Administrators. However, some newly added fields are hidden by default. Administrator involvement is required to make these fields available to end users.

## How to Customize the Form

Once the Admin has determined which modification are necessary on the WOE form they will simply open the Custom Form Editor to begin making updates. On the Custom Form Editor the Admin is allowed to show or hide a field or section, make fields required or leave them optional, modify what values are displayed and the order in which they appear in the dropdown. To access the custom form editor, follow the steps below:

1. Log into SoftPro Live using Administrator credentials
2. Click on 'Administration' > select 'Web Order Entry' tab
3. Custom Form Editor screen is displayed
4. Make necessary updates to custom form editor
5. Choose to Save or Publish. If you wish to cancel updates, simply close the Customer Details tab.

Figure 9.0 – Accessing the Custom Form Editor

## Custom Form Editor Details

The screenshot shows the Custom Form Editor interface. At the top, there is a 'Section Name' field containing 'Transaction Information' with a star icon, and a 'Show' checkbox which is checked. Below this is a table with the following structure:

Default Label	Show	Required	Label	Items
Provider	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	Provider	
Transaction Type	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	Transaction Type	Items

At the bottom right, there are two buttons: 'Save' and 'Publish'.

Figure 10.0 – Custom Form Editor

Custom Form Editor Details		
Ref#	Field	Description
<u>1</u>	Section Name	Section name label text can be modified or removed (blank).
<u>2</u>	Show Section	Checkbox is checked by default to display section. Uncheck checkbox to hide section. NOTE: some sections cannot be hidden, i.e. – Transaction Information section.
<u>3</u>	Default Label	Default field label for Admin to reference if field label is modified
<u>4</u>	Show Field	Checked by default to display field. Uncheck to hide field. Note: some fields cannot be hidden, i.e. – Transaction Type in Transaction Information section.
<u>5</u>	Required Field	Unchecked by default unless it is a system required field, i.e. – Provider. Note: If a field is made required but is also made hidden the form will still be able to be submitted.
<u>6</u>	Label	Field label that can be modified or removed (blank).
<u>7</u>	Items	Click “Items” button to view or modify what values are displayed in drop down fields.
<u>8</u>	Save Button	Click Save to save a draft of your changes. Changes are not be available to end users until the customized form is published. Note: Save button remains disabled until changes are made to the form.
<u>9</u>	Publish Button	Click Publish for end users to immediately use the updated form.

Figure 10.1 – Items dialog for dropdown values

Items Details		
Ref#	Field	Description
<u>1</u>	Label	Value displayed in the dropdown field on the WOE form. The default value is the current mapping to the SoftPro order. Admins can change this value so WOE users see a different option in the dropdown and it will map to the applicable field value in order. An error is displayed if the Admins entered a value that is duplicated or empty. <i><u>*If the value cannot be found in the order then it will be written to Order notes.</u></i>
<u>2</u>	Show	Checkbox is checked by default to display dropdown value. Uncheck to hide.
<u>3</u>	Sort Order	Sort order of dropdown values can be changed to control which values appear first or last in a dropdown. An error is displayed if the sort orders are duplicated or empty.
<u>4</u>	X	Click 'x' to close Items dialog without saving changes.
<u>5</u>	Done	Click 'Done' to close Items dialog and commit changes. Note: Validation error will display after clicking 'Done' if invalid values exist.

**(NEW)** Figure 10.3 – Property Type Items dialog

Order Type and Property Type		
Ref#	Field	Description
<u>1</u>	Empty Default Row <b>(NEW)</b>	Admins have the ability to add their own values to the Order Type & Property Type dropdowns. An empty row is displayed by default and as soon as a value is entered the row will be checked "Show" and sort order will increment to the next available number. Values will map to the applicable field value in order. An error is displayed if the Admins entered a value that is duplicated or empty. <i><u>*If the value cannot be mapped in the order then it will be written to Order notes.</u></i>

### Municipal Searches (New)

Municipal Searches is a newly added section on the Custom Form Editor. It is not included on the default Web Order Entry form. To use this section, Administrators need to "Show" the section and all fields within the section before publishing to end users.

Custom Form Editor — Web Order Entry

Default Label	Show	Required	Label
Air Resource Search ★	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Air Resource Search

## Validation Errors

### Required Fields (WOE)

- Fields made required on the Custom Form Editor will display validation text immediately on the WOE form when published. However, fields in the Parties and Contacts section will only display validation text after user does the following:
  - o Adds the party or contact to the order, by clicking the “Add” button.
  - o User puts focus into the party or contact fields and tabs out.
- Fields made required on the Custom Form Editor that are not displayed on WOE form (i.e. – show checkbox is unchecked or business rules prevents the field from being displayed) the required field text will not be displayed and The user should still be able to submit the order.
- The Submit Order Button will remain disabled until all required fields are filled out.

Dropdown fields	<div style="border: 1px solid #ccc; padding: 5px;"> <div style="border: 1px solid #ccc; padding: 2px;"> <span>Select Transaction Type</span> ▼ <span style="float: right;">*</span> </div> <p style="color: #a52a2a; font-size: small;">Please select an item in the list.</p> </div>
Text fields	<div style="border: 1px solid #ccc; padding: 5px;"> <div style="border: 1px solid #ccc; padding: 2px;"> <span>\$</span> <input style="width: 100px;" type="text"/> <span style="float: right;">*</span> </div> <p style="color: #a52a2a; font-size: small;">Please fill out this field.</p> </div>
Submit Order	<p style="color: #a52a2a; font-size: small;">Please fill out all required fields.</p> <div style="text-align: right; margin-top: 10px;"> <span style="border: 1px solid #ccc; padding: 5px 15px; margin-right: 10px;">Cancel</span> <span style="background-color: #4a86e8; color: white; padding: 5px 15px; border-radius: 3px; cursor: pointer;">Submit Order</span> </div>

Figure 11.0 – WOE Validation Errors (Required Fields)

### Invalid Data (WOE)

- Fields entered with invalid data on the WOE form will display validation text immediately after the data is entered and user tabs out.

Phone or Mobile	<div style="border: 1px solid #ccc; padding: 5px;"> <div style="border: 1px solid #ccc; padding: 2px;"> <span>(999) ___-___</span> <span style="float: right;">☎ *</span> </div> <p style="color: #a52a2a; font-size: small;">Please enter a valid phone number.</p> </div>
-----------------	---

Email	<input type="text" value="email"/> @ Please include an '@' in the email address. 'email' is missing an '@'.
Attachments	<input type="button" value="Choose Files"/> No file chosen  world.jfif File type not allowed.

Figure 11.1 – WOE Validation Errors (Invalid Data)

### Invalid Data (Custom Form Editor)

- Fields entered with invalid data on the Custom Form Editor will display immediately on the Items dialog for dropdown values.

Items for Transaction Type ×

Label	Show	Sort Order
<input type="text"/>	<input checked="" type="checkbox"/>	<input type="text" value="1"/>

Label name cannot be duplicate / empty.

Figure 12.0 – Form Editor Validation Errors (Invalid Data)

## Office Name

Administrators can enter an office name for the profile associated to their Provider – see Figure 13.0. Once entered, this value appears in the “Office” dropdown on the WOE form for end users – see Figure 13.1. NOTE: If multiple profiles are associated to a Provider then the office name for each profile appears in the “Office” dropdown. This provides end users with the ability to choose the specific office they wish to place their order with.

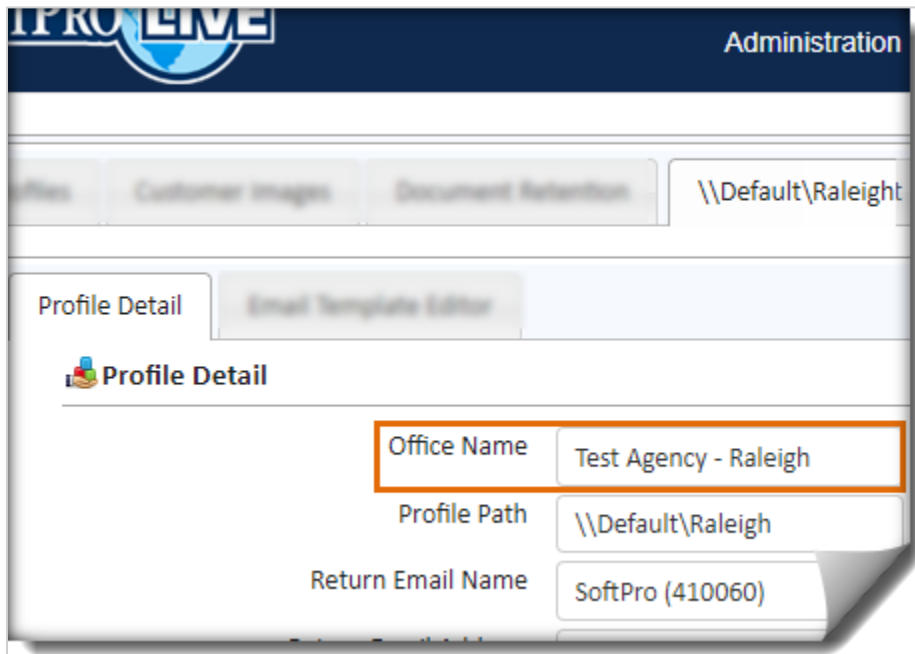

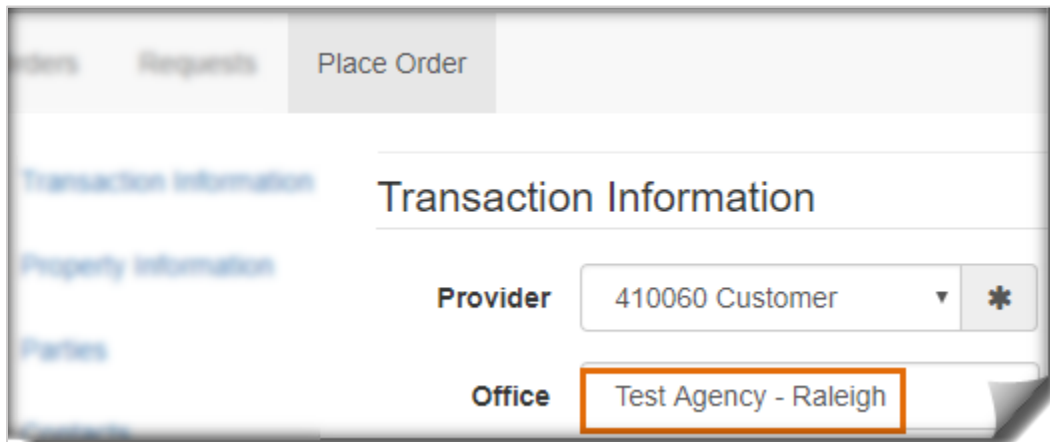

Figure 13.0 – Office Name (Administration > ‘View’ profile > Profile Detail screen)

13.1 – Web Order Entry (Office)

### Viewing Orders in the 360 Queue (by Office)

When “Office” is submitted with an order, the selected office is displayed in the Provider’s 360 Queue under the “Provider Reference Name” column – see figure 14.0. The 360 user can easily sort this column to view orders placed for a specific office by clicking on the column header. They can also utilize the 360 Queue view options (edit or create new view) to filter by Provider Reference Name – see figure 14.1. With this filter applied, users will only see orders submitted for that specific office.

	Provider	Service	Status	Provider Reference Name
➔	SoftPro	Live	New	Test Agency - Raleigh

Figure 14.0 – 360 Queue (Provider Reference Name)

Property	Operator	Value
Provider Reference Name	Equals	Test Agency - Raleigh

Figure 14.1 – Filter Orders (by Office)

## Receiving Email Notifications (by Office)

Additionally, when the “Office” is selected and submitted with an order, the email address associated to the office Profile will be used for sending email notifications. Previously, email notifications were routed to a single email address since there was no convenient way to identify which office the order was submitted to – see figure 15.0.

The screenshot shows a web form titled "Profile Detail" with a sub-header "Profile Detail" and a small icon. The form contains several input fields for configuration:

Office Name	Test Agency - Raleigh
Profile Path	\\Default\Raleigh
Return Email Name	SoftPro (410060)
Return Email Address	noreply@liveqa1.softprohq.com
From Email Address	noreply@liveqa1.softprohq.com
Base URL (For Email Links)	https://lq1.softprohq.com
Routing Number	410060\\Default\Raleigh
Notification Email Address	Michelle.Leonard@SoftProCorp.com

At the bottom, there is a section for "External Systems" with a checkbox labeled "Encompass" which is currently unchecked.

Figure 15.0 – Email Notifications (by Office)

## Newly Added Fields to the Custom Form Editor

In future releases, new fields added to the WOE form by system updates will not automatically be published to end users. Administrators must first go into the Custom Form Editor to make the new field shown and publish to end users. There will be a visual indicator for Administrators to easily notice the field is new and has not yet been published.
