Table of Contents

Summary

SoftPro Select new features and enhancements are highlighted below.

4.6.0 (5/13/2019)

- **Start Page**
    - The Select start page has been reconfigured and the default start page has a new look and feel.
    - You can choose to have a custom start page to the application.
    - An option is available to continue to use the legacy custom start page engine.
- **Title**
    - You can now link Policy and Commitment exceptions.
    - Endorsements can be overlaid from another order.
    - The sort order of Endorsements can be moved up or down, or sorted alphabetically by the description.
- **Worklist Grouping – Beta Feature**
    - This feature provides the ability to group worklist results.
    - Users now have the ability to provide feedback on this feature.
- **Plug-ins**
    - Added support to specify configuration information in plug-in SDK.
    - Added an API to associate users and groups with plug-ins.
    - Added the ability to view/add/edit configuration details of plug-ins.
    - Added the ability to enter license keys on a plug-in in SPAdmin.
    - SoftPro can now certify third-party plug-ins and notify Admins when a plug-in has not been signed by SoftPro.

4.6.1 (6/24/2019)

- **Automation**
    - The automation wizard has a new action that allows you to assign a specific trust account to the order.
    - A new option allows you to send an email notification in the event of a process failure.
- **Plug-ins**
    - Added support for shared assemblies across Shell packages in the same plug-in.
    - Removed the “News Feed Synchronization” job and relevant artifacts from the system.

4.6.2 (8/14/2019)

- **Bug fix**
    - Fixed a deadlock issue when querying to update or remove a conversation.

4.6.3 (9/20/2019)

- **Bug fixes**
  - Fixed an issue where the Property screen was not loading in upgraded orders created with version 4.5.0.
  - Resolved an issue with new 360 Automation processes not activating.

4.6.4 (10/11/2019)

- **Internal release - bug fix**
  - This was an internal release to correct an error that occurred when upgrading to version 4.6.1 and the installation package contained multiple plug-ins.

4.6.5 (12/16/2019)

- **Documents and Reports**
  - Added a new SPAdmin report for Redirected Documents/ReadyBlocs.
  - Added a new report to show all documents or reports that are pinned in SPAdmin.
  - Commercial Settlement Statement documents have been reformatted to an HTML version, and are available in ReadyDocs.
- Bug fixes

4.6.6 (1/23/2020)

- **Bug fixes**
  - Downloaded plugins were not visible; Select was not completely removing the previous instance of shell plugins when in debug mode.
  - Plugins were not visible or were not working properly when multiple plugins referenced a common library.

4.6.7 (1/31/2020)

- **Bug fix**
  - The system was failing when upgrading plugins for some customers.

ProForm

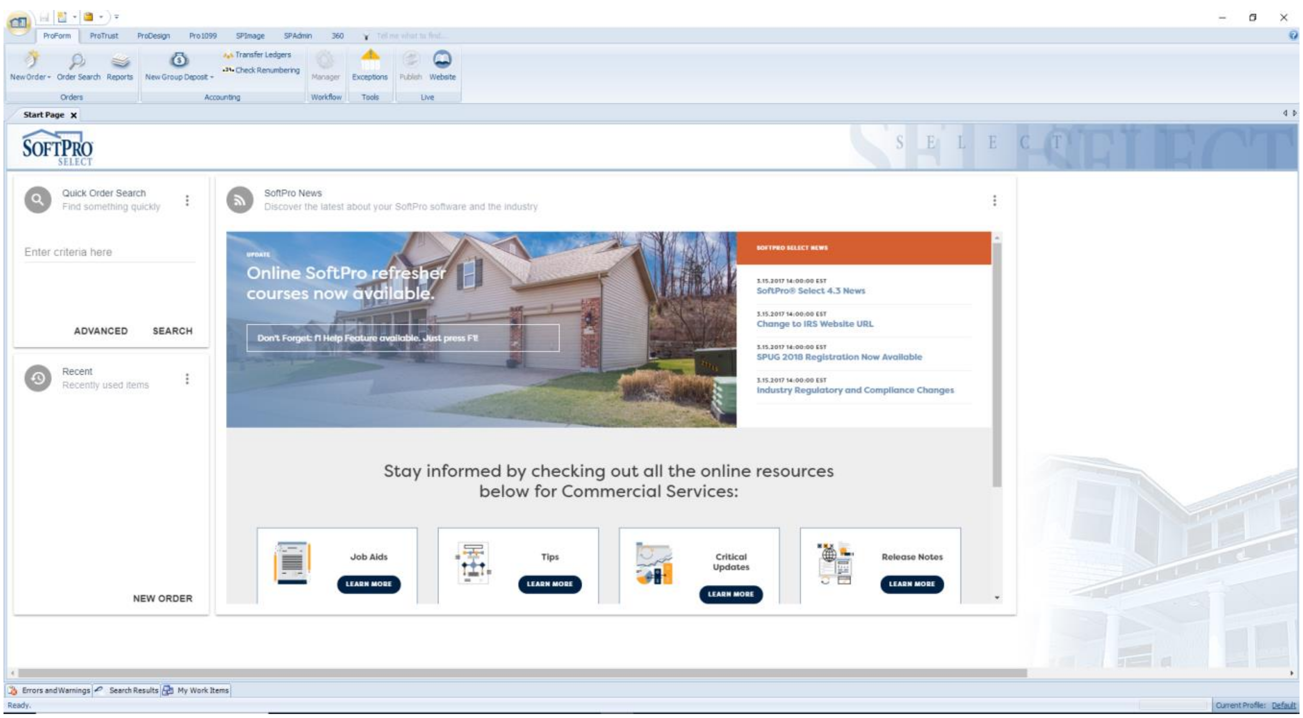
Select Start Page

- The Select start page has been reconfigured and the default start page has a new look and feel.
- A Custom Start Page Manager will allow Admin users to enter a URL for custom start pages and the ability to use a legacy custom start page engine.

New Start Page

The Select start page has been redesigned.

- The quick order search is still available to view recent orders.
- Create a new order by clicking the **New Order** button on the lower left panel.
- The new start page is supported by a chromium browser.



Custom Start Page Manager

If you have a *custom* start page, a new Custom Start Page Manager has been developed. This is an optional screen and only needs to be enabled when a different start page should be used. For more information, see Custom Start Page Manager in the SPAdmin section.

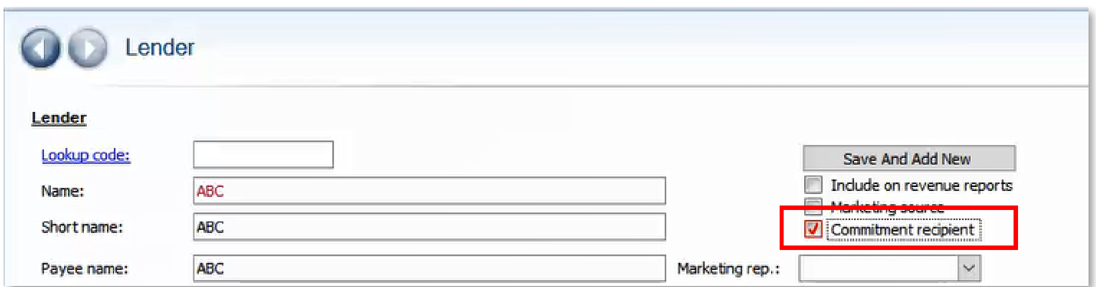
Order

Order Contacts

Commitment Recipient

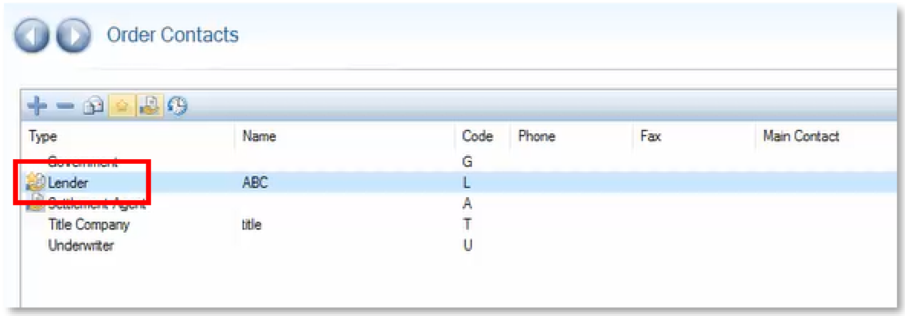
- This is a new feature to allow an order contact to be marked as a Commitment Recipient.
  - The **Commitment Recipient** icon is located on the Order Contacts toolbar.

  - The **Commitment Recipient** checkbox is available on all Order Contact screens.



- You can check the box from the contact page.
  - You can add it to the lookup table for future reference.
- You can also mark the commitment recipient from the Order Contacts grid by selecting a contact to highlight, clicking on the icon, and the icon will appear next to the contact type.

  - If you click the Marketing Source icon (existing functionality), the icon changes to include both the Marketing Source and the commitment recipient.



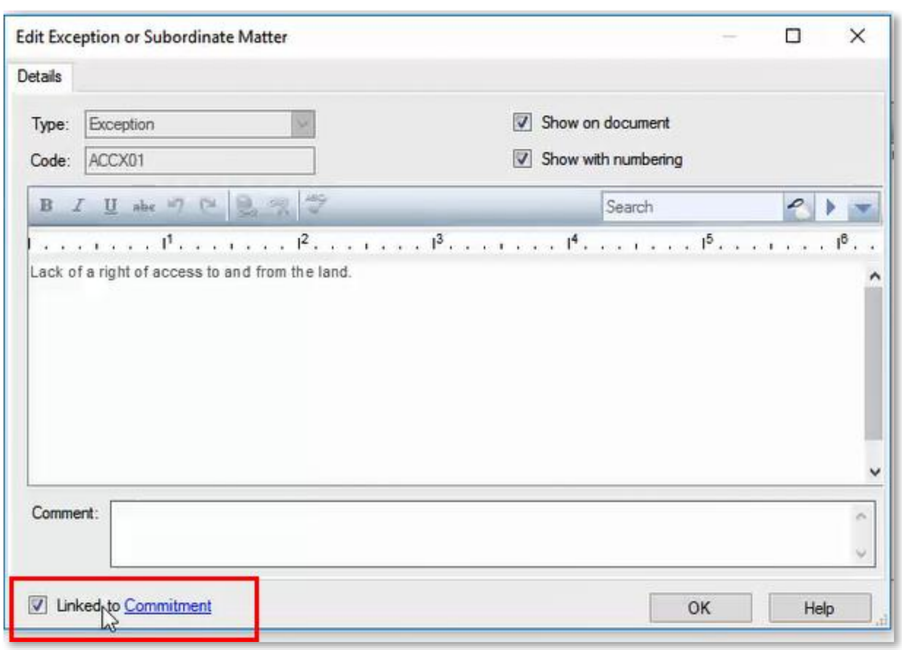
- When the lookup table for zip codes had filtering turned on, entering in zip codes and pressing Tab was not auto-populating the related fields; *resolved*. *11752*
- The License ID was not defaulting for contact people when that person was added to a contact automatically via the Escrow Officer/Closer dropdown selection; *resolved*. *506843*

Title

Linking Policy and Commitment Exceptions

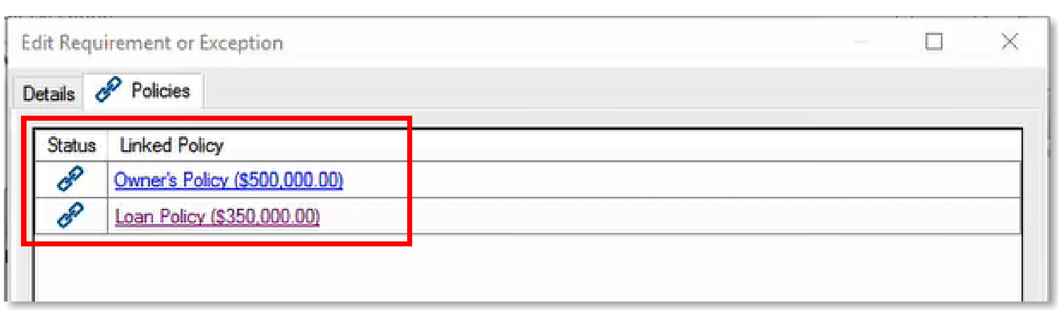
This is a new option for policy exceptions to be linked to their related commitment exceptions and requirements.

- On the Policy - Schedules B1, B2 screen, click the **Start Policy** button, then click on an Exception.
  - The Edit Exception or Subordinate Matter pop-up has a new checkbox: **Linked to Commitment**.



- The checkbox default can be set to checked (On), or unchecked, (Off). This preference is set in SPAdmin.
  - When defaulted to checked, anytime you select **Start Policy** to pull your commitment exceptions to the policy, or select to **Import** your exceptions onto your policy from the commitment, the exceptions would automatically be linked.
- Click on the **Linked to Commitment** link, and it opens the dialog for the commitment exception, where you can make any edits as needed.
  - Any edits made on the commitment exception will update automatically on the policy exception.
- If you don't want them to be linked any longer, you can uncheck the box. This allows you to edit the commitment exception, but the update will *not* flow to the policy exception. It also allows you to edit the policy exceptions to be different from the commitment exception.
  - If you decide you want to link them again, check the box again, and any edits will be updated.
- On the commitment side, to be able to see whether a policy is linked by clicking on the exception, and viewing the linked or broken link icon on the Policies tab on the dialog .
  - If you have more than one policy that has that same exception and one of them is linked and one is not, the tab icon will show as a broken link to indicate that at least one policy has a broken link.

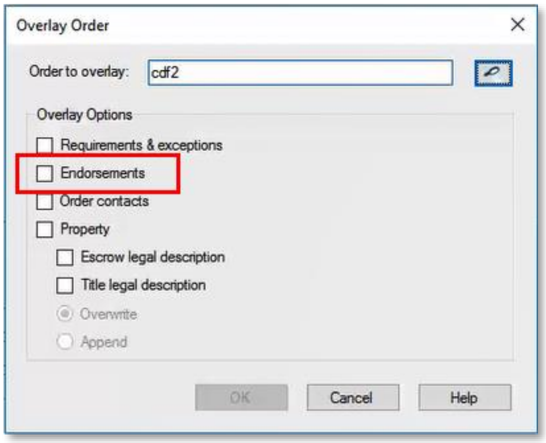
  - If all of them are linked, the tab icon will show as linked.



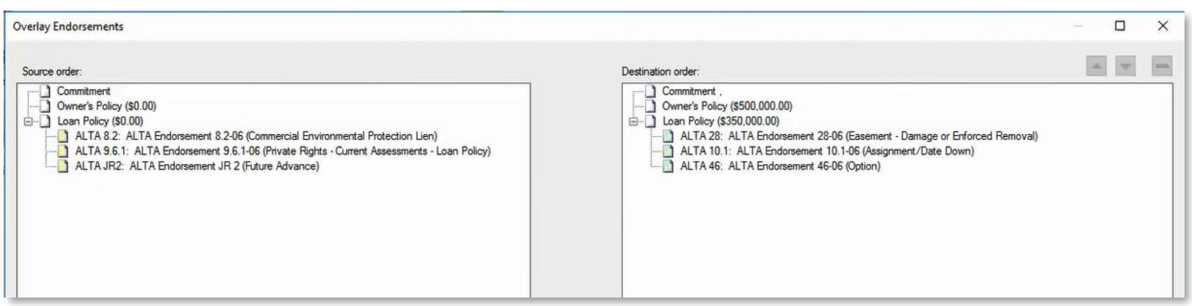
Overlay Endorsements

This new option allows you to take an order than has endorsements in it and overlay the endorsements into another order.

- The new overlay **Endorsements** option is available in the Overlay Order pop-up.



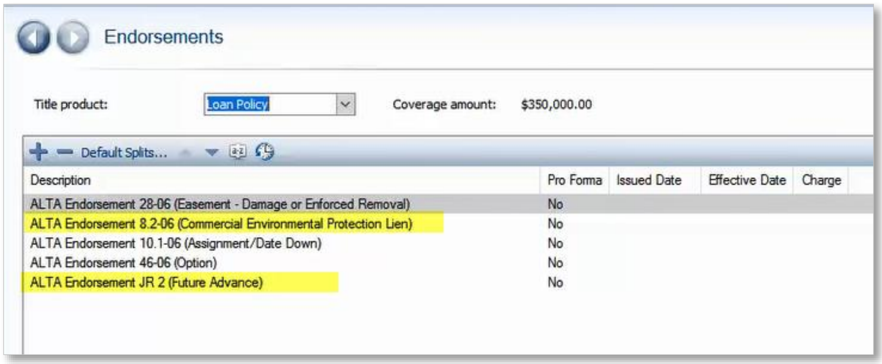
- Check the **Endorsements** box, and a new screen opens to select which endorsements to overlay into the order.
    - Source order – contains the Endorsements in the order to be overlaid into the current order.
    - Destination order – the current order that will contain the endorsements already in the order and any new endorsements selected for overlay.



- You can copy the entire folder or select individual endorsements, and either **drag and drop** from the Source order to the Destination order, or click the **Add** button.

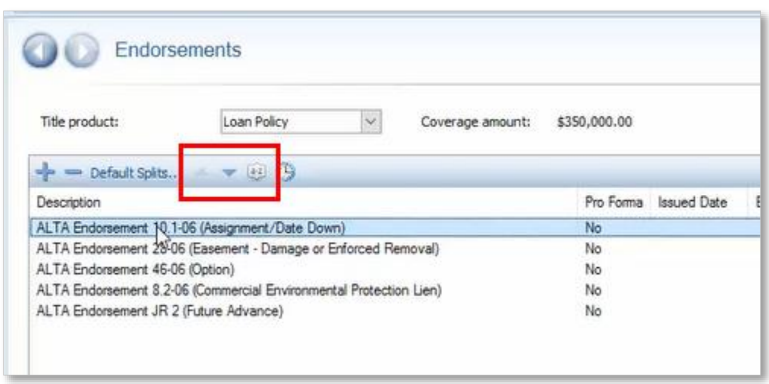
- To modify the endorsements you've added to the Destination order, you can:
    - Remove any endorsements using the minus button.
    - Move an item up or down using the up and down arrows.

- The new endorsements that were just added appear in the Endorsements grid.



Sort Endorsements

- The Endorsements toolbar has new buttons that allow you to sort the list for the selected title product:
  - Move an item up with the up arrow
  - Move an item down with the down arrow
  - Sort alphabetically – this will sort by the endorsement description. Numerical items will be sorted by character, e.g., 1, 10, 2, 28.



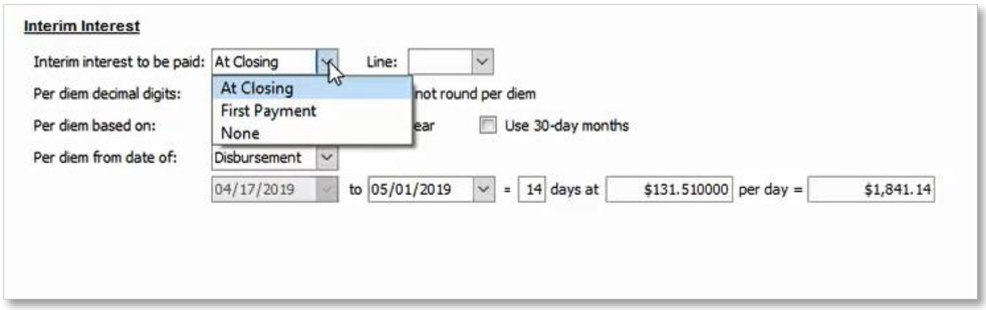
- The Loan Policy Premium was calculating incorrectly when the Owner's policy coverage is greater than Loan Policy coverage, instead of the "Premium to Split" amount showing as zero, it was calculating based on the rate table; *resolved*. 11315

- An error was thrown when attempting to overlay a subordinate matter into a loan or owner's policy exception; *resolved*. 519720

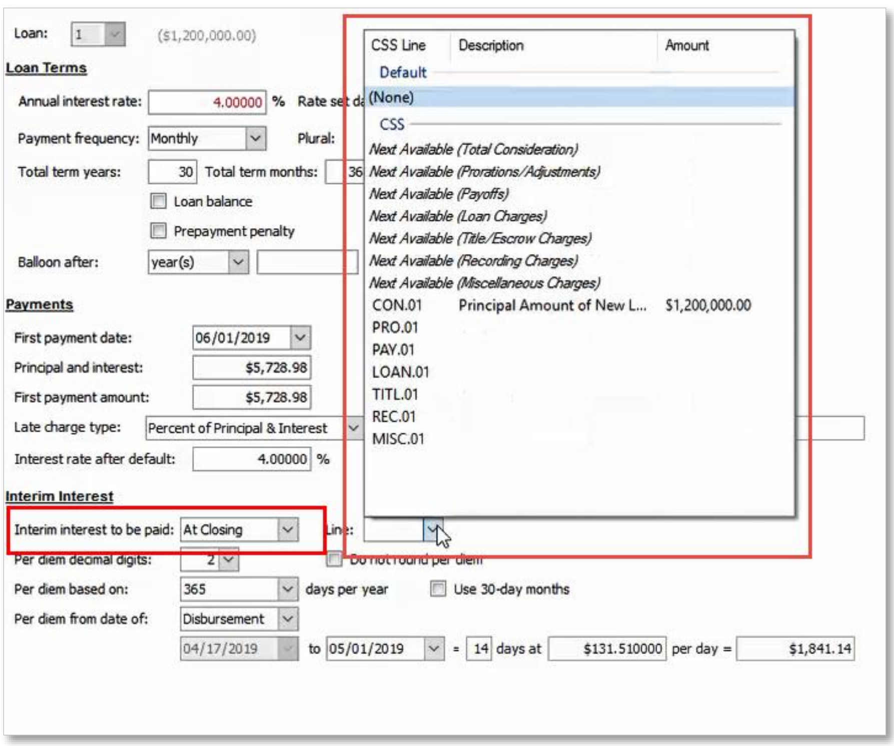
Commercial

CSS Interim Interest

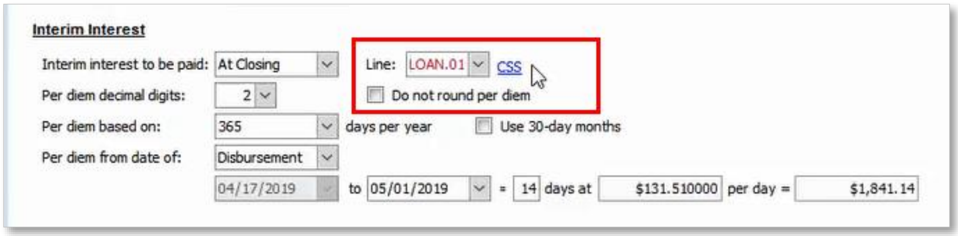
- The Interim Interest to be paid now has a drop-down so that now you can select when the interim interest is to be paid, in this example, At Closing.



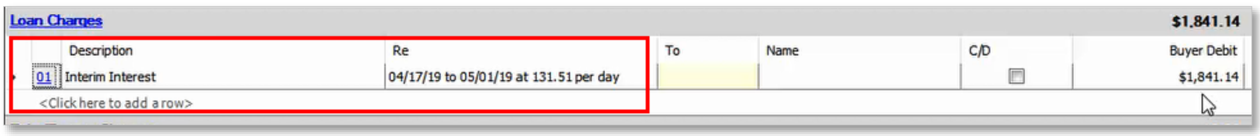
- You can also select the CSS line to send the Interim Interest to:



- When you select a line from the drop-down, a CSS link will appear next to the line.



- Clicking the CSS hyperlink takes you to that line, and the Interim Interest will show the dates, the per day amount, and the total amount for the Buyer debit.



Documents & Attachments

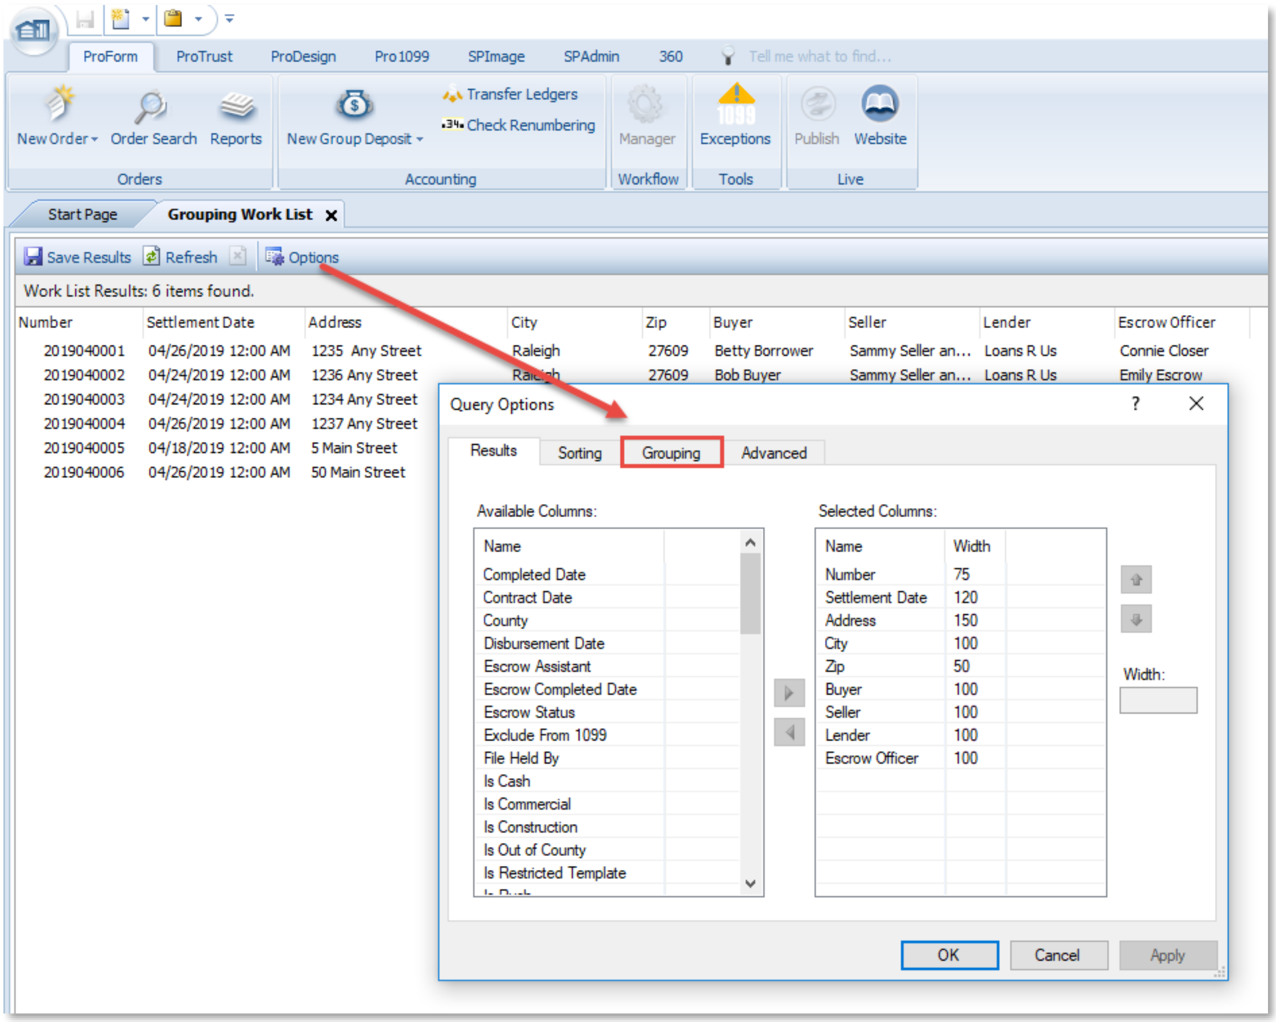
- The Drag and Drop function from the Select Attachments to the desktop was not working properly, requiring multiple attempts, and sometime incurring an error; *resolved*. *11046*
- Moving an attachment from one folder to another could result in duplicate copies and an error message when trying to open or delete the attachment; *resolved*. *11952*
- Some versions of Select experienced slowness when editing the filename of an attachment in an order; *resolved*. *11977*

Worklist Grouping – Beta Feature

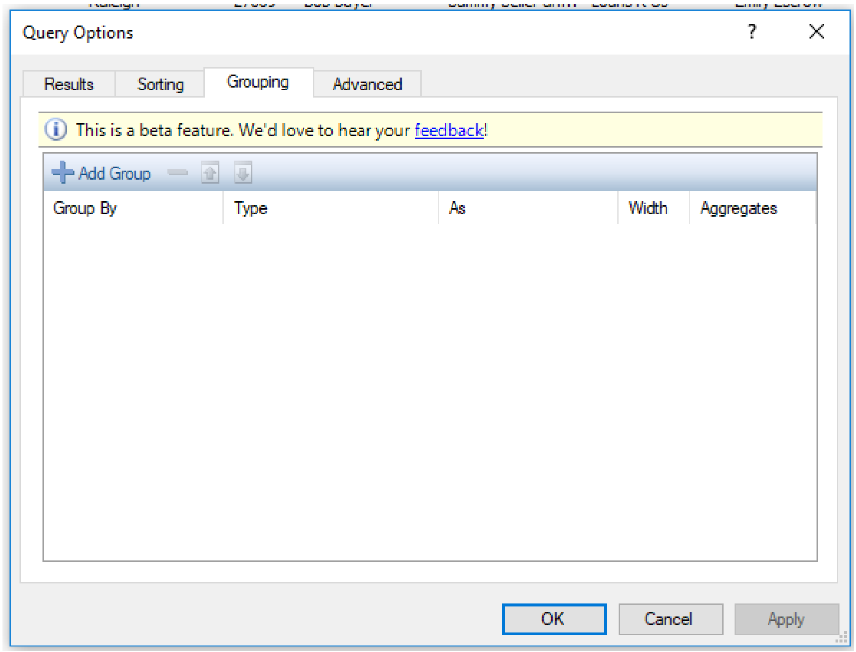
- Provides the ability to group worklist results
- Users now have the ability to provide feedback on this feature

The results from a Work List query currently display in a single list view. A new feature which is currently in beta allows users to ‘group’ the results. Here is how it works.

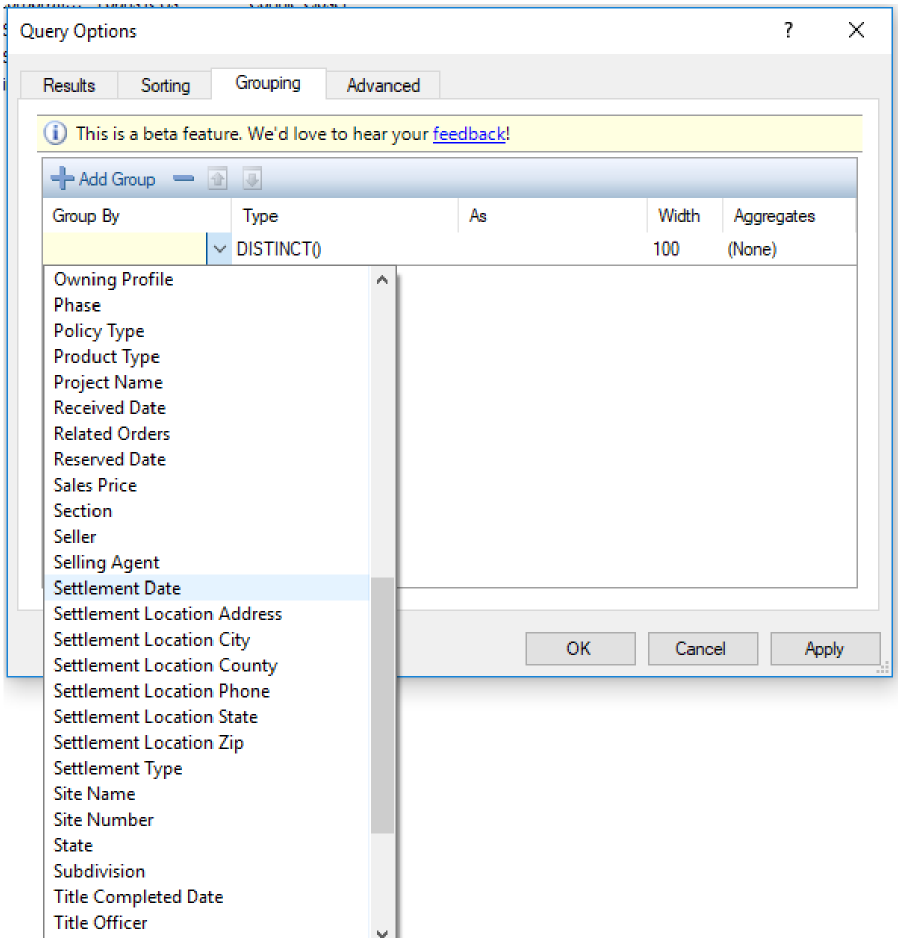
- After running a Work List query, click **Options** to see a new Grouping tab on the dialog.



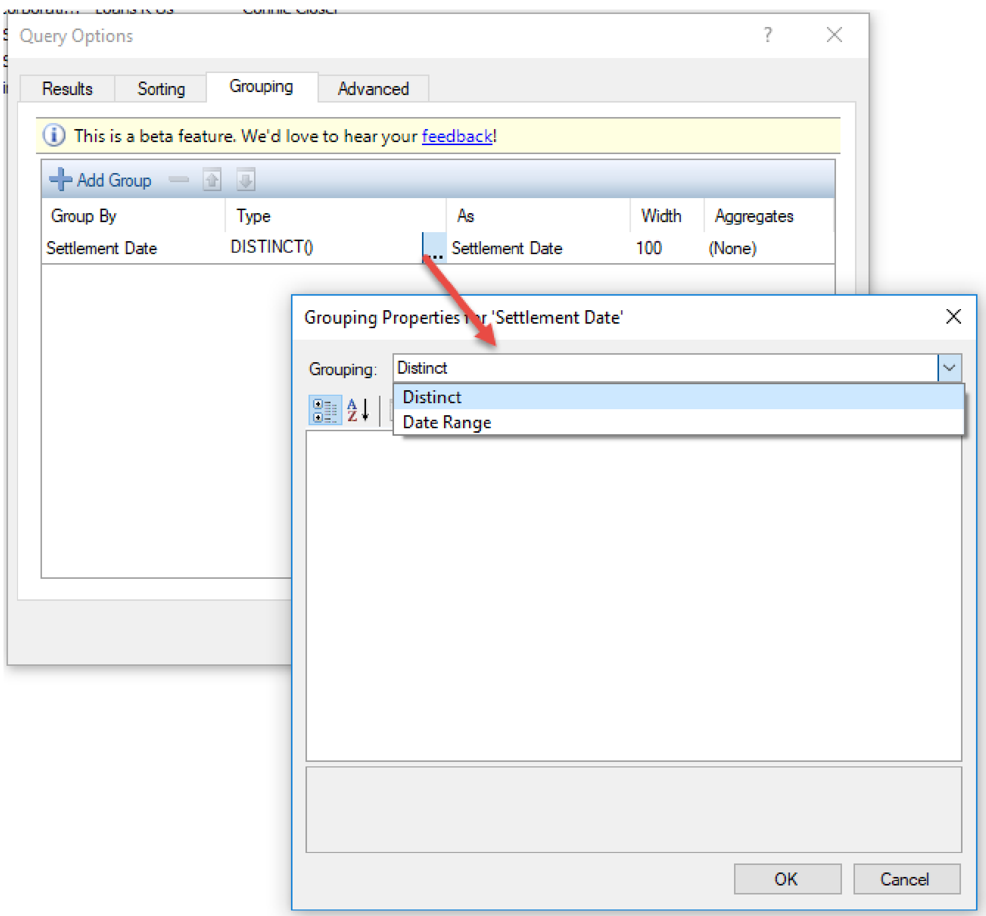
- Click the **Grouping** tab to enter new groupings.



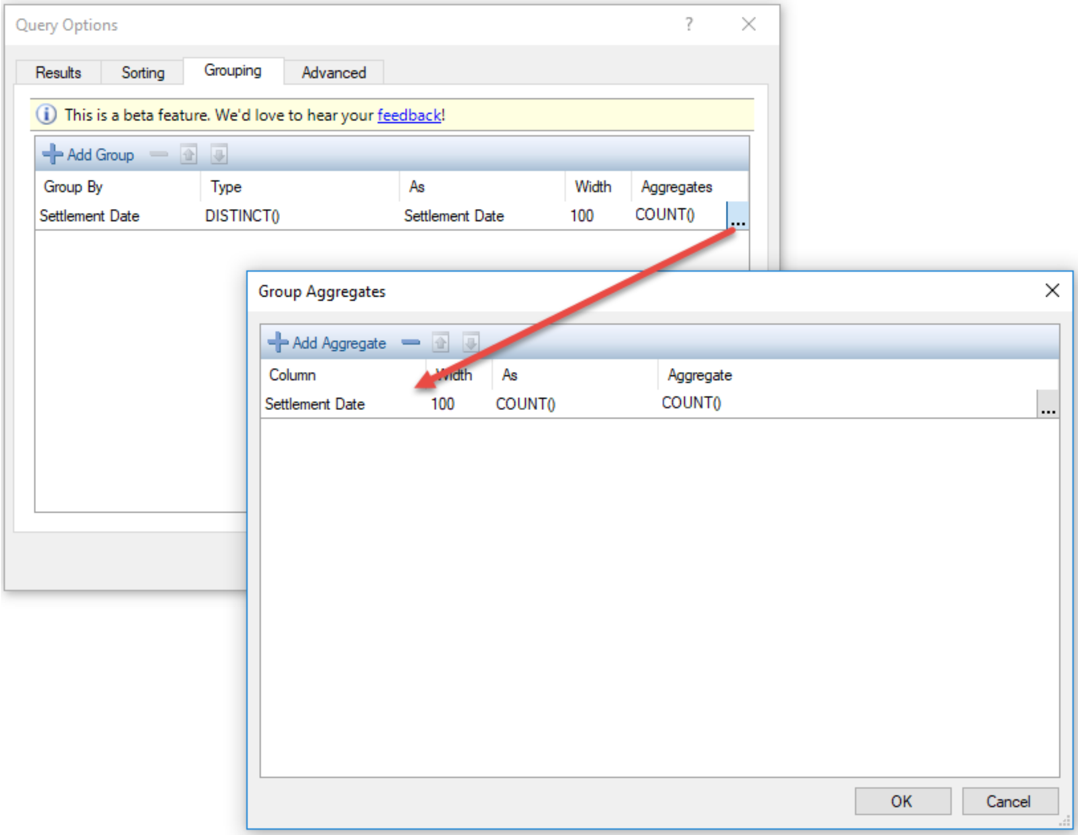
- To add a new grouping, click the **+Add Group** button.
- Select a method to group by from the Group By dropdown list. For example, to group results by Settlement Date, click **Settlement Date**.



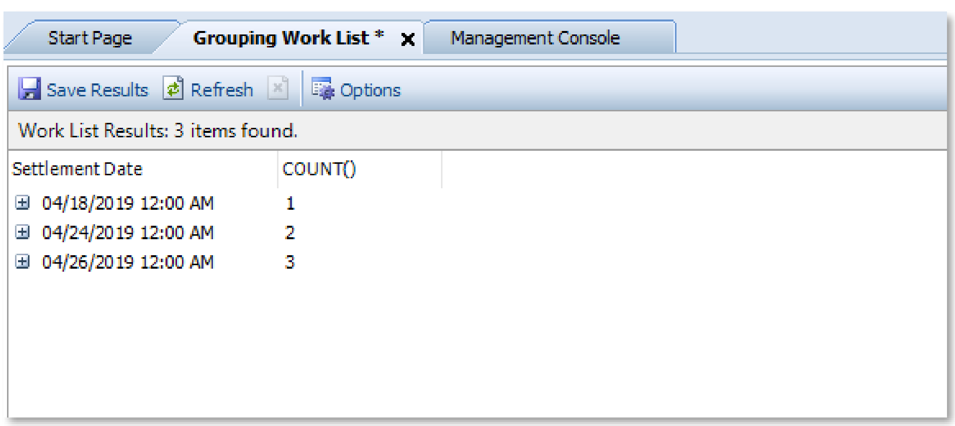
- For a date grouping, you can group by distinct dates or by a date range. In this example, the results will group each date separately.



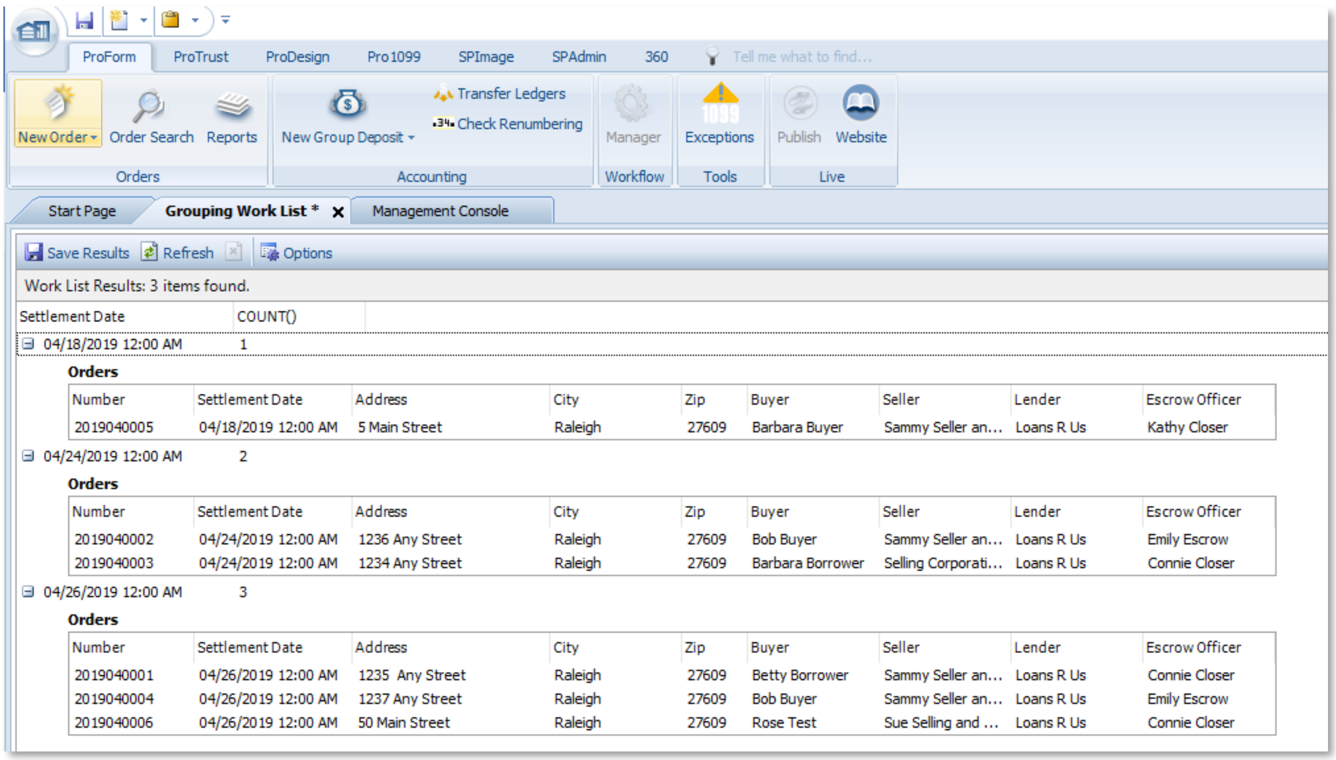
- You can also specify how to display the totals. In this example, the count will display the number of files closing for each Settlement Date.



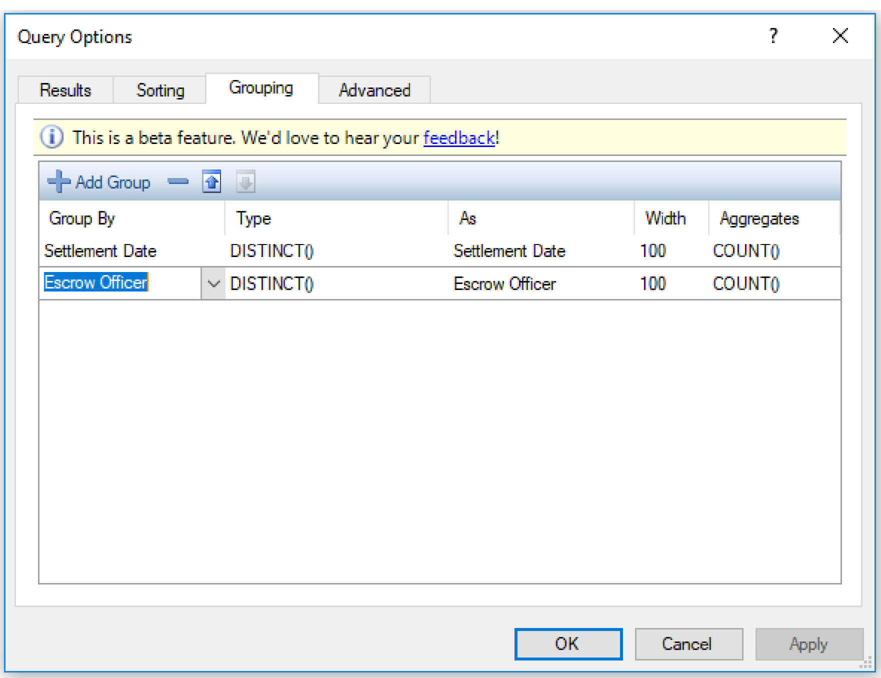
- Click **Refresh** to see the results:



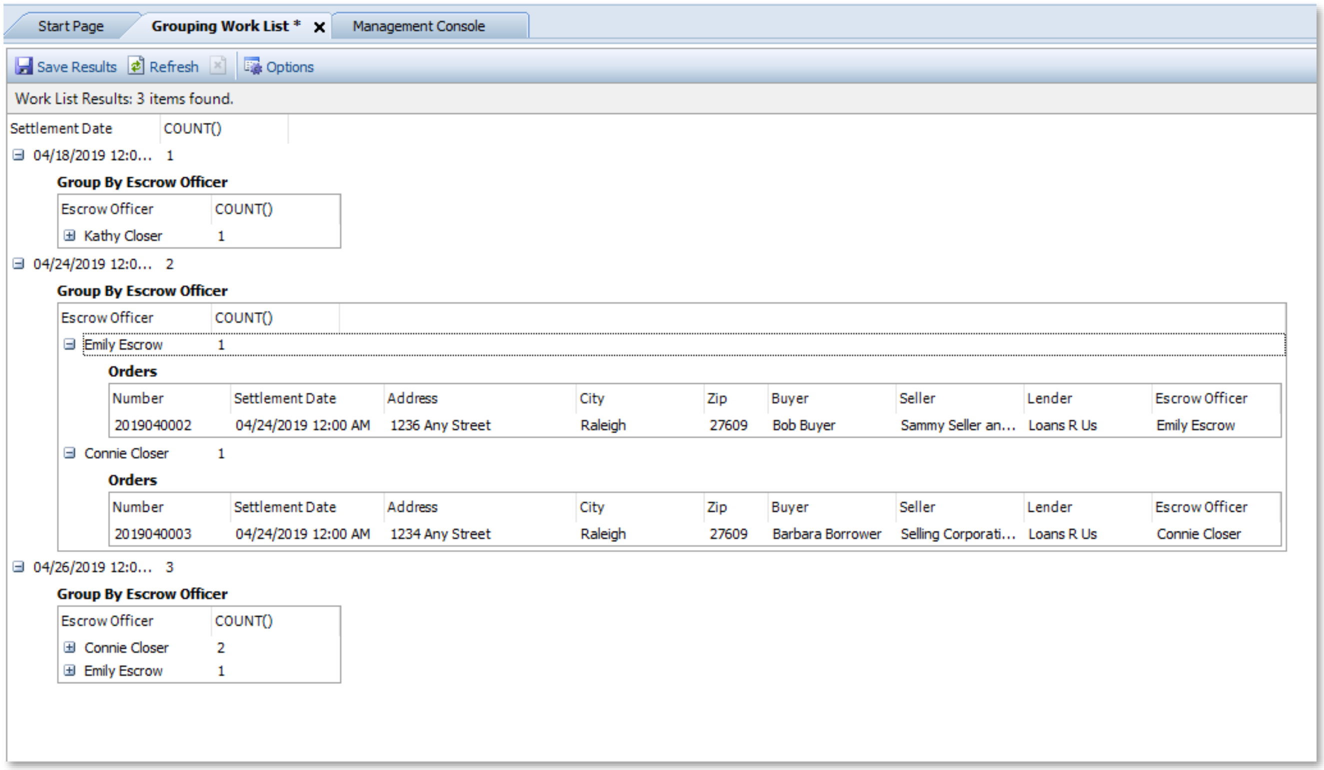
- Expand each group to see the details for each day.



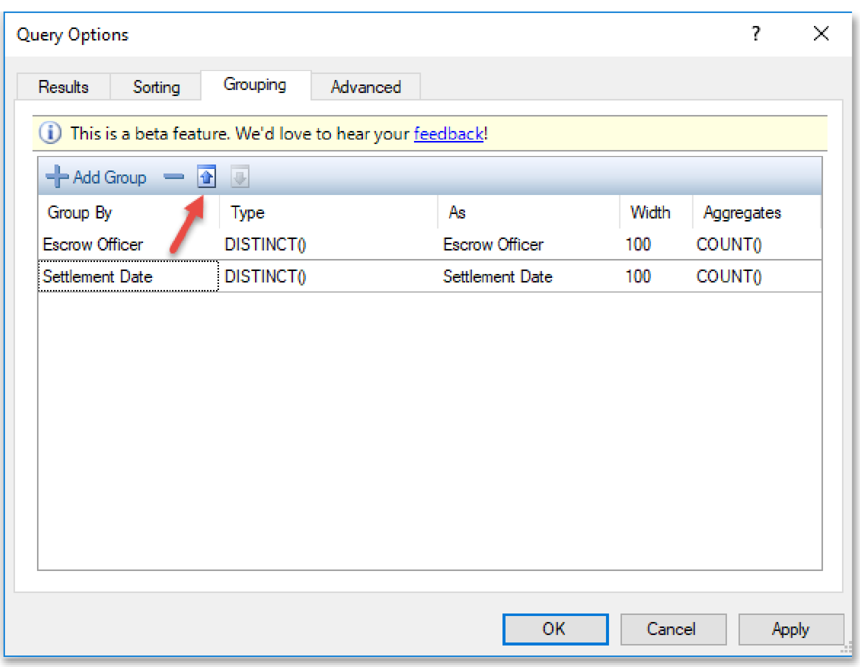
- To group this list further by Escrow Officer, add another group for Escrow Officer.

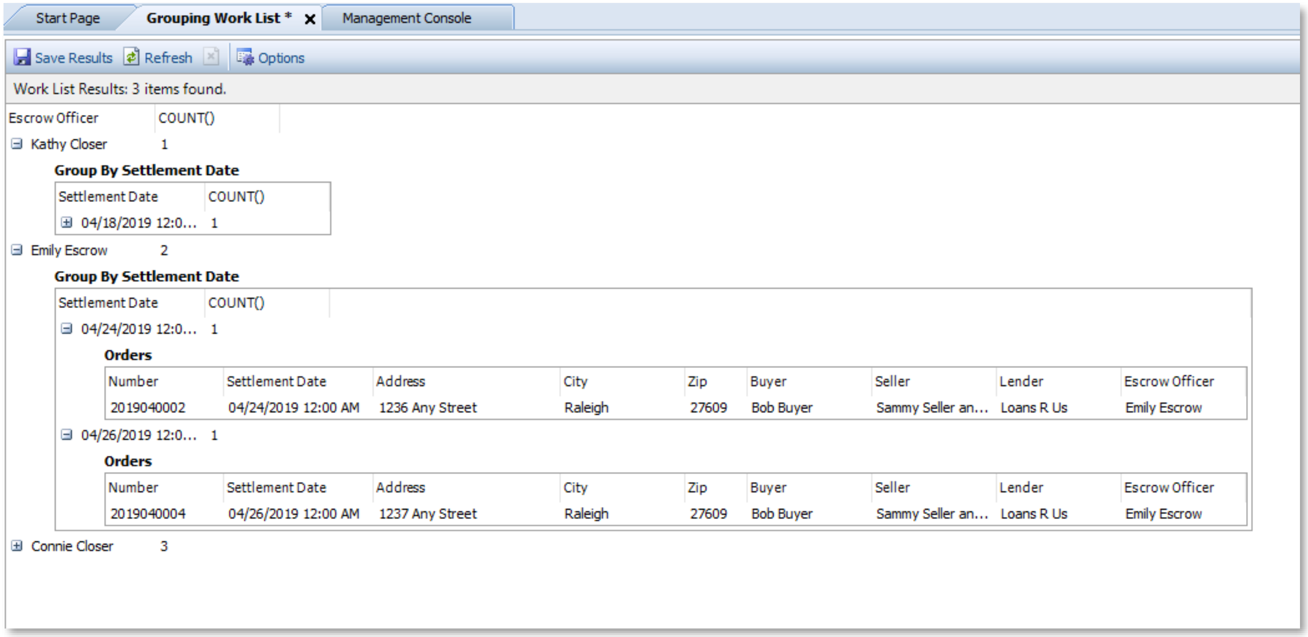


- Click **Refresh** to see the results grouped by Settlement Date and then by Escrow Officer.



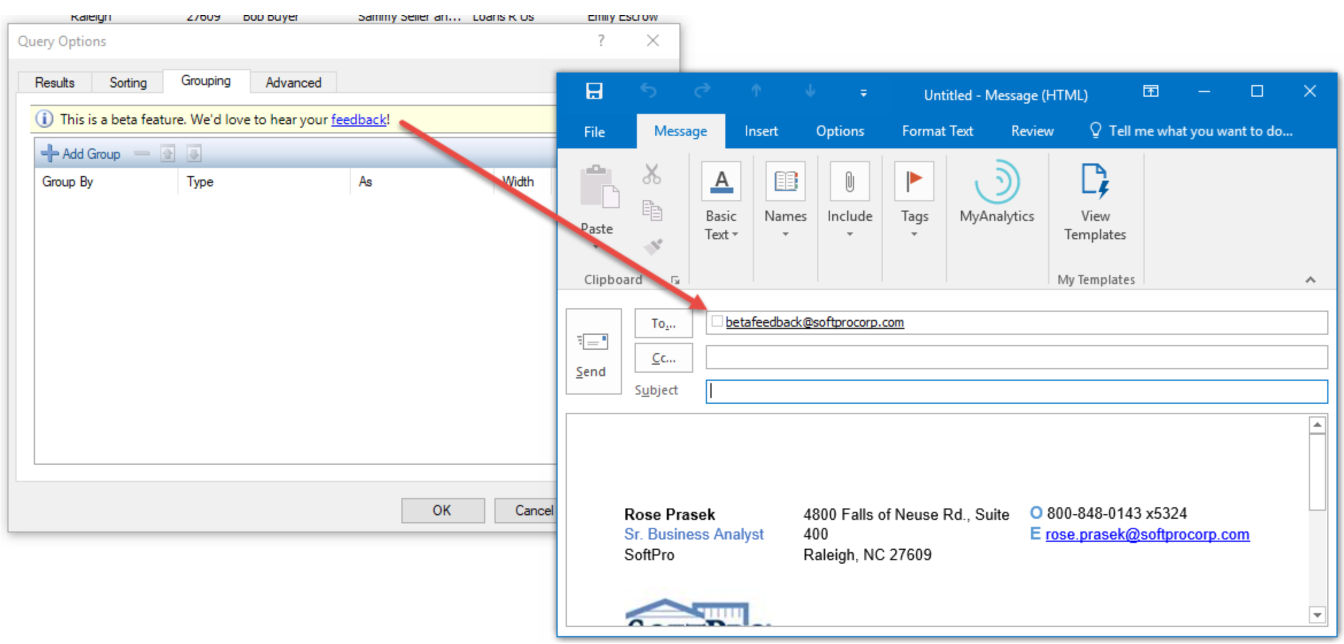
- You can change the order of the grouping by using the arrow to move the Escrow Officer above the Settlement Date. Refresh the results to see the grouping first by Escrow Officer, followed by the number of closings for each Settlement Date.





Provide Feedback to SoftPro

You can provide feedback to SoftPro by clicking on the feedback link on the Grouping tab.



- When a user has been deleted and recreated, the orders and tasks assigned do not appear in My Orders and My Tasks for that user; *resolved*. 11753
- The Workflow Tasks License is being used when a user is logged into the application, and a subsequent user is also logged into Workflow tasks; *resolved*. 11795
- An unexpected error occurred in Work Lists when running "New Work List" and entering the value @CurrentMonthEnd or @PrevMonthStart; *resolved*. 11800

ProTrust

- When trying to post a transaction in the register, Select was unable to resolve conflicts with other users, and the merging conflicts error did not specify what failed to merge; *resolved*. 11808
- Processing time was less than optimal for some users performing reconciliation or preparing construction draws; *resolved*. 12365

Pro1099

- Pro1099 Records were still showing the TAX ID number of a spouse after being removed from ProForm; *resolved*. 11799

SPAdmin

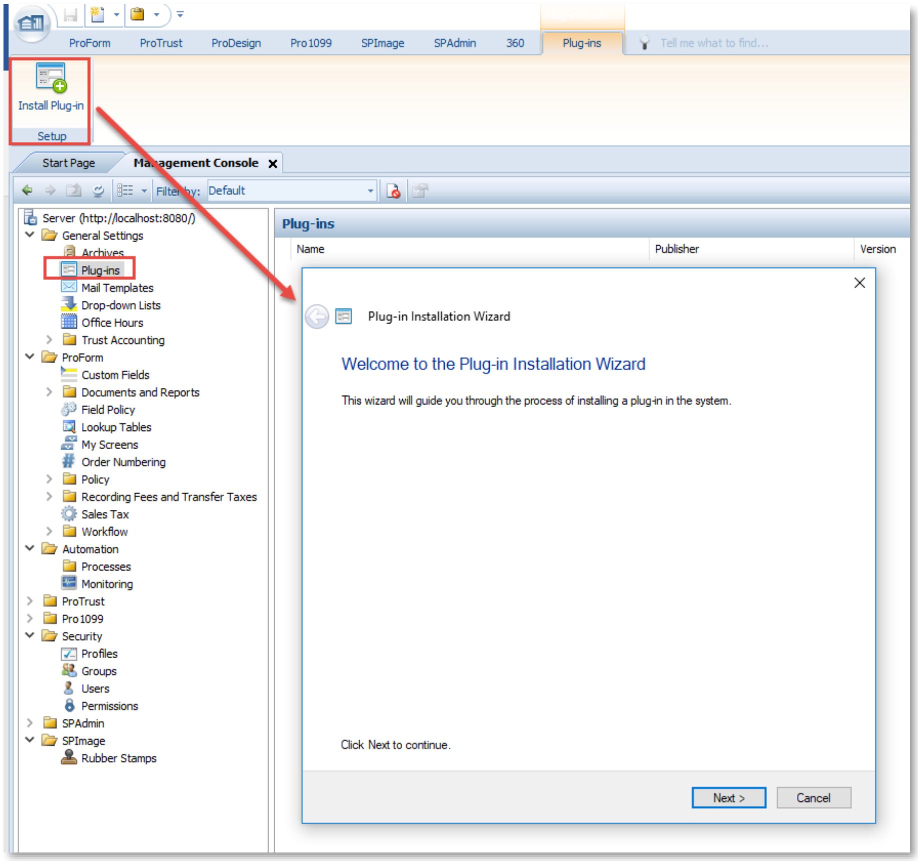
Plug-ins

The 4.4 release unified the packaging and deployment of custom integrations through the concept of a plug-in. Version 4.6 includes the following enhancements to the plug-ins:

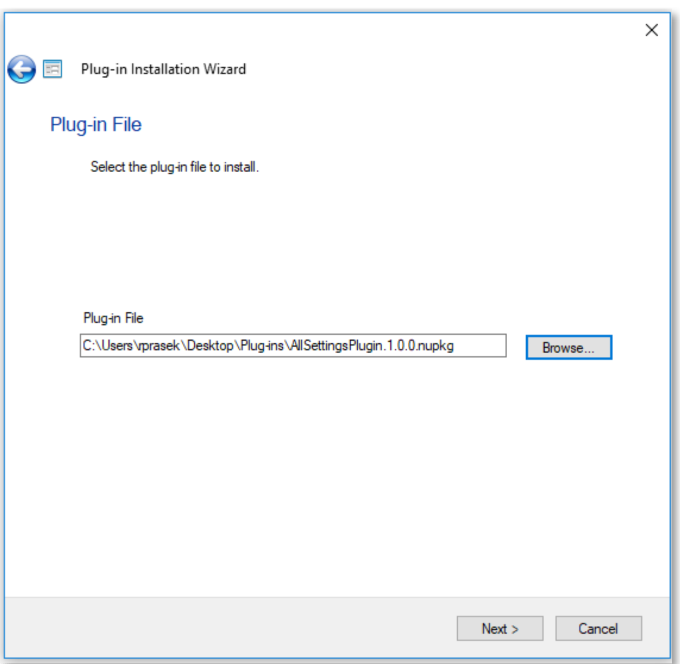
- Added support to specify configuration information in plug-in SDK
- Added an API to associate users and groups with plug-ins
- Plug-ins can be associated with users/groups after installation
- Added the ability to view/add/edit configuration details of plug-ins
- Added the ability to enter license keys on a plug-in in SPAdmin
- SoftPro can now certify third-party plug-ins and notify Admins when a plug-in has not been signed by SoftPro

The Plug-in Installation Wizard can be accessed here:

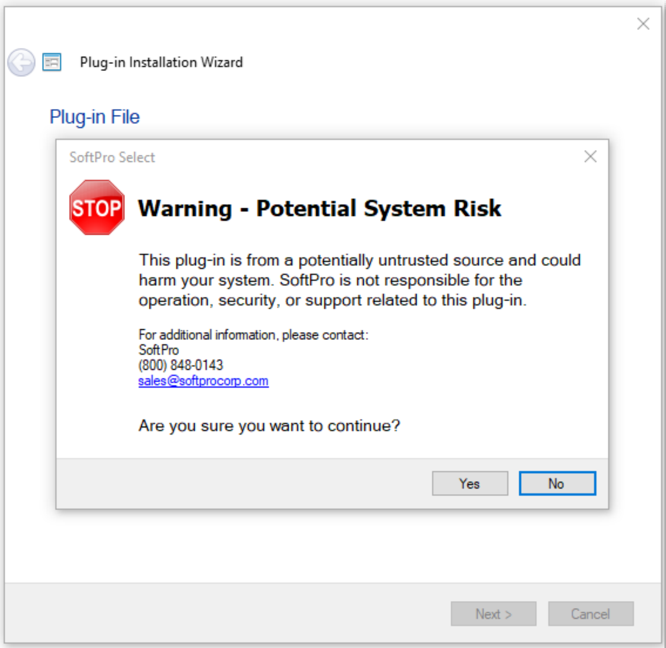
SPAdmin > General Settings > Plug-ins > Install Plug-in



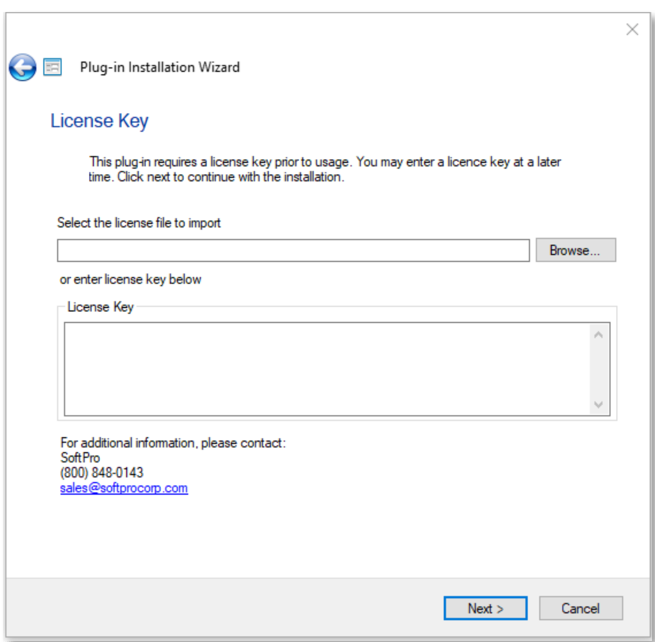
- Click **Browse** to select the plug-in file to install.



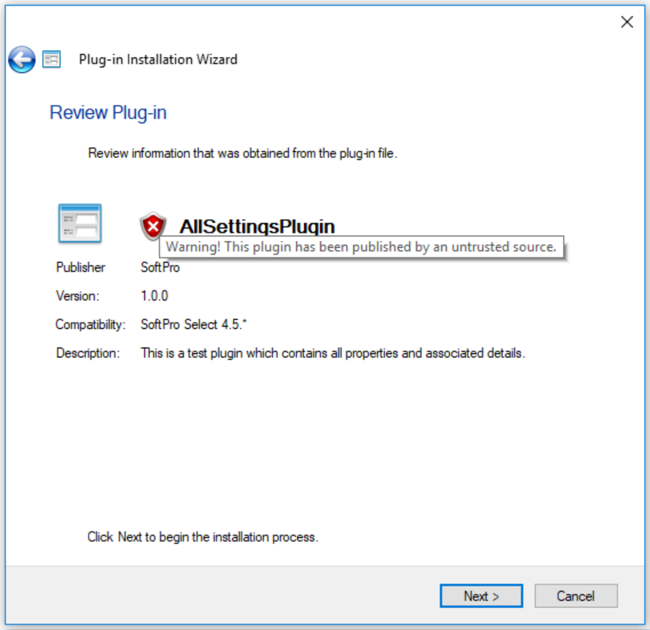
- If the plug-in has not been signed by SoftPro, a Warning will display to the Admin user. To stop the plug-in from installing, click **No**. Click **Yes** to continue installing the plug-in.



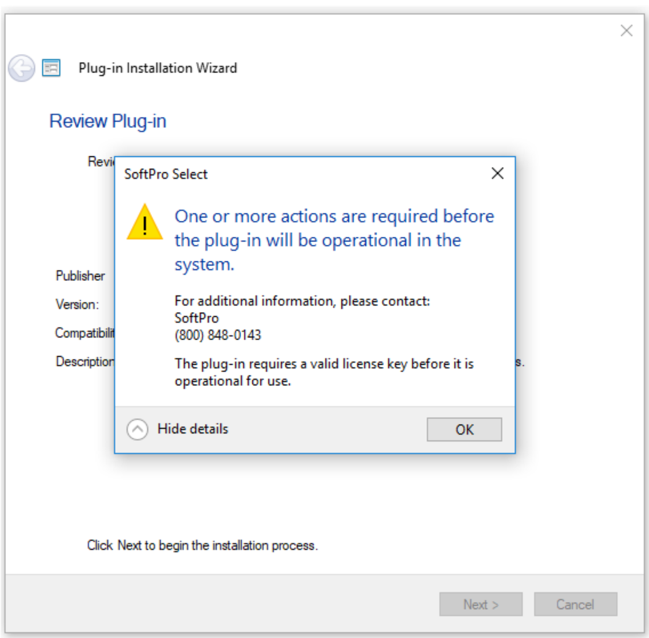
- If the plug-in requires a license key, a License Key screen will display. The license key can be entered either by browsing to the license file or copying and pasting the license key. Plug-ins can still be installed without a license key but will not be enabled until a license key has been entered.



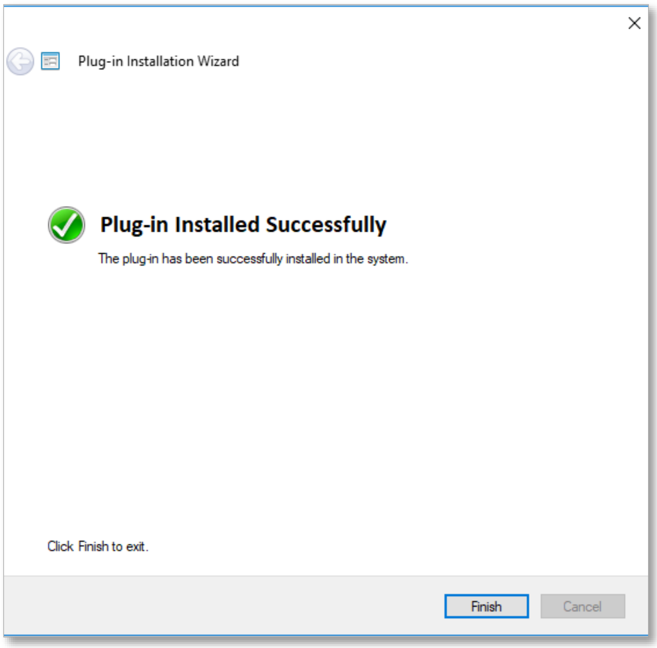
- Prior to installation, a Review of the Plug-in will display. For plug-ins that have not been signed by SoftPro, a warning will display.



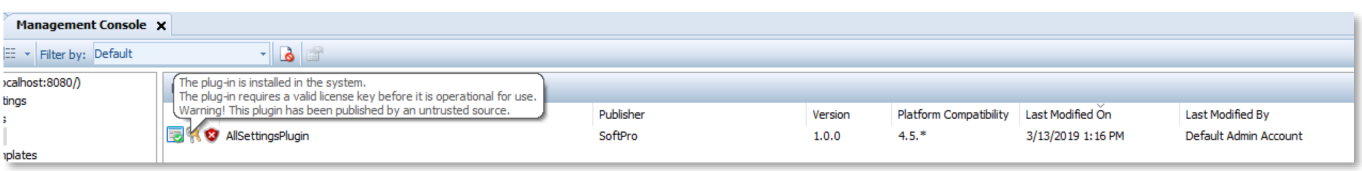
- Click **Next** to begin the installation process.



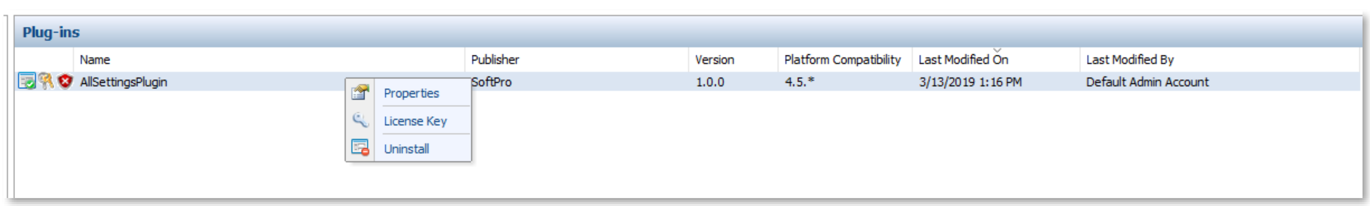
- When the plug-in has been installed successfully, the following screen will display.



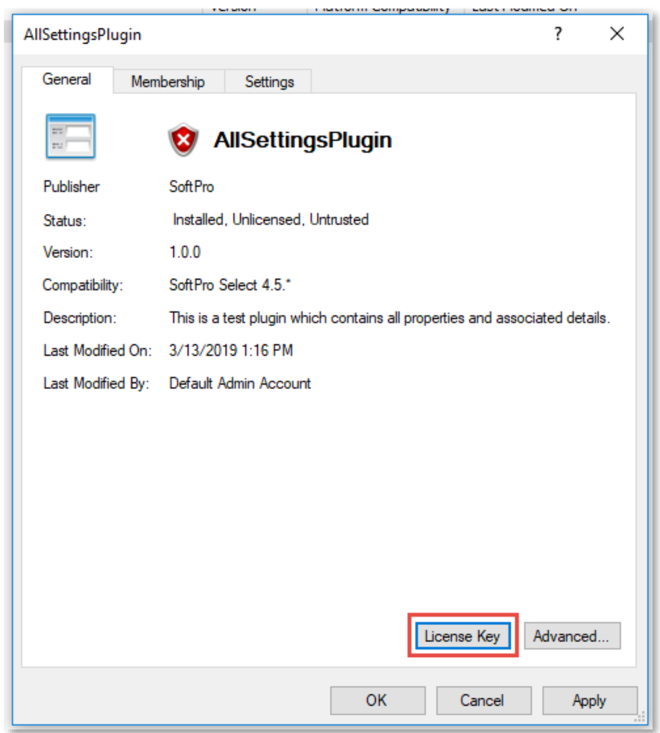
- The management console displays the plug-in information and status icons. Hovering over the icon will display a tooltip showing the status.



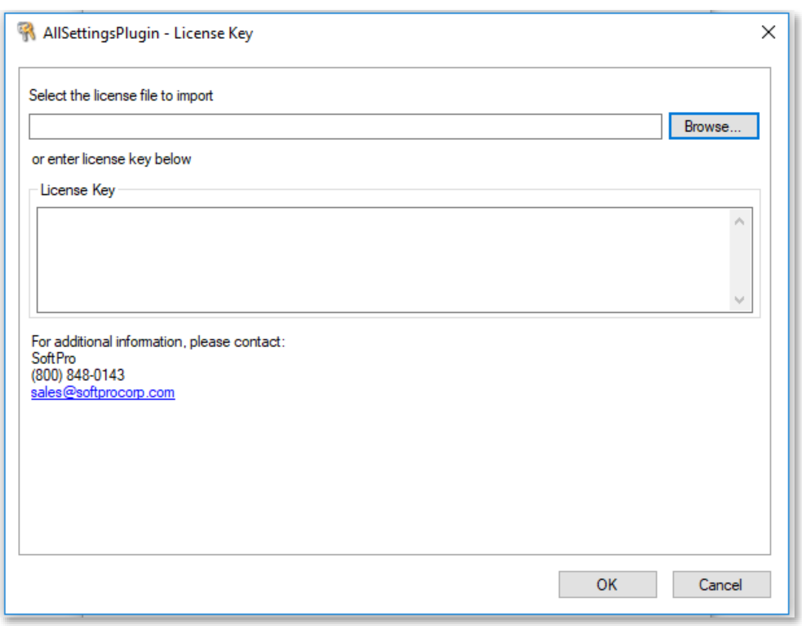
- Access the Properties page by double-clicking the plug-in, or right-click to access the plug-in, enter a license key, or uninstall the plug-in.



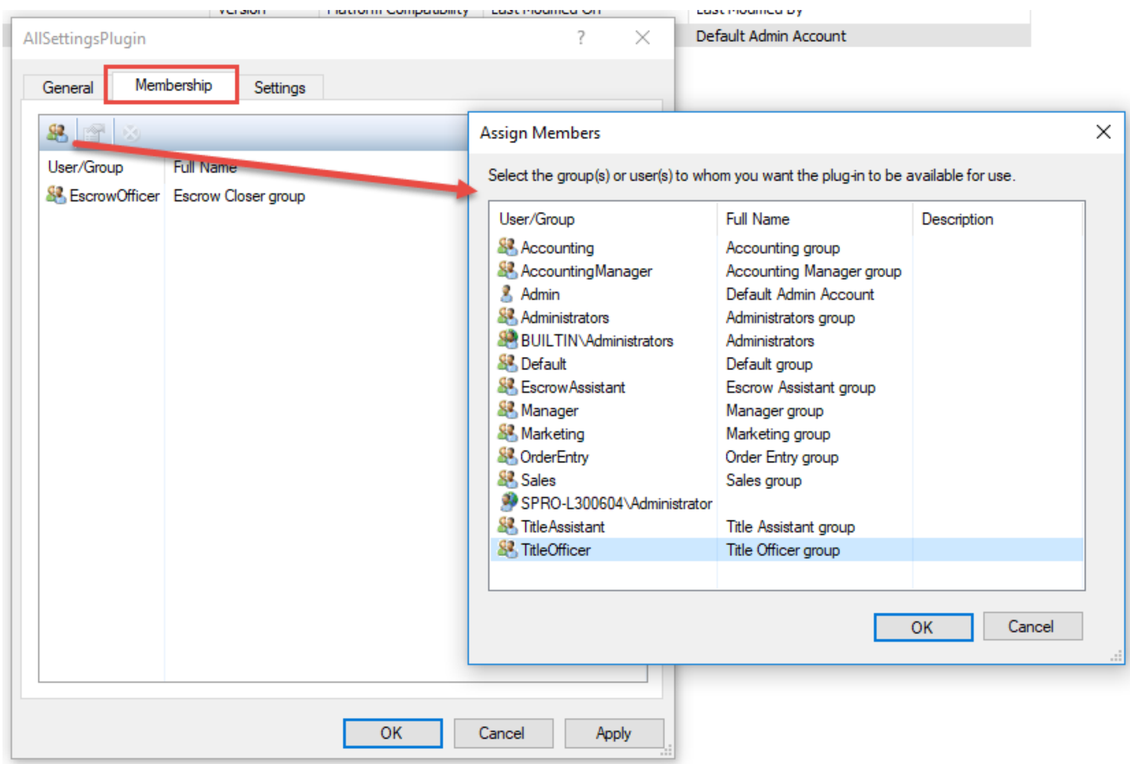
- You can associate members, configure settings (if applicable), or enter a license key from the properties dialog. To enter a license key on an installed plug-in click the **License Key** button.



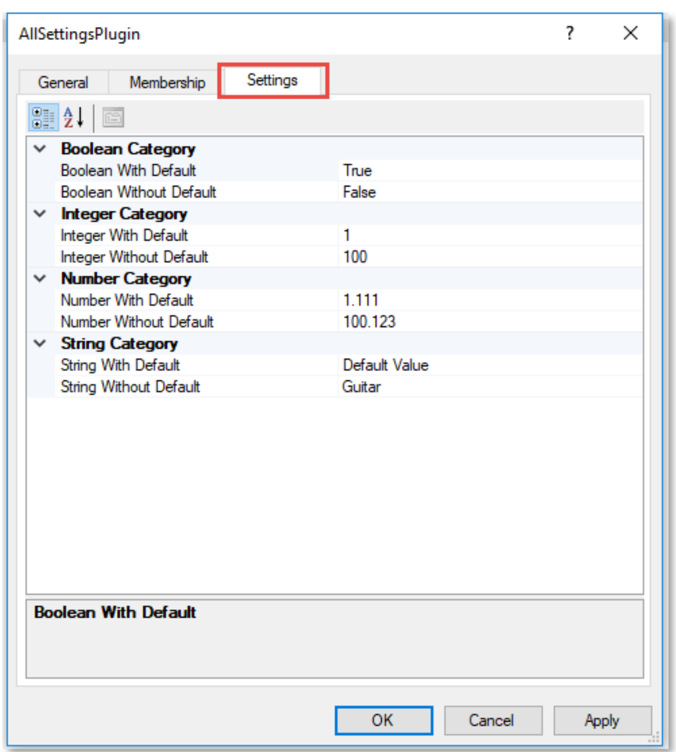
- Enter the license key by browsing to the license file or copying and pasting the license key.



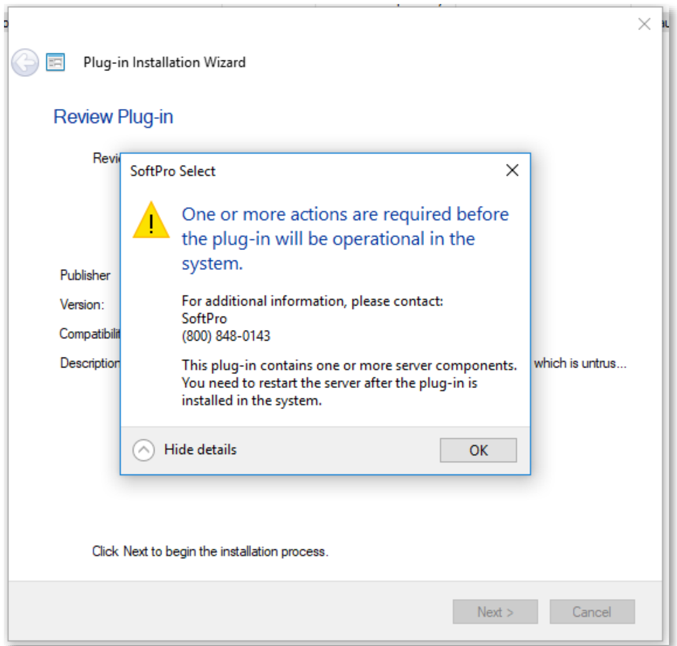
- To associate users/groups with a shell package plug-in, click on the **Membership** tab. If the plug-in license requirements are satisfied but no User/Group is added, the plug-in will not be available to any users. When User/Group is added or removed they will be added or removed when the client is launched.



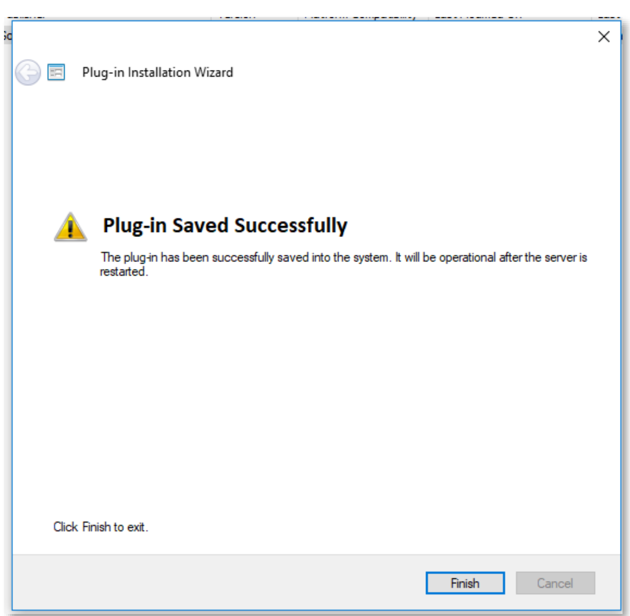
- If the plug-in has configuration settings, a **Settings** tab will display. Click on the tab to select the settings.



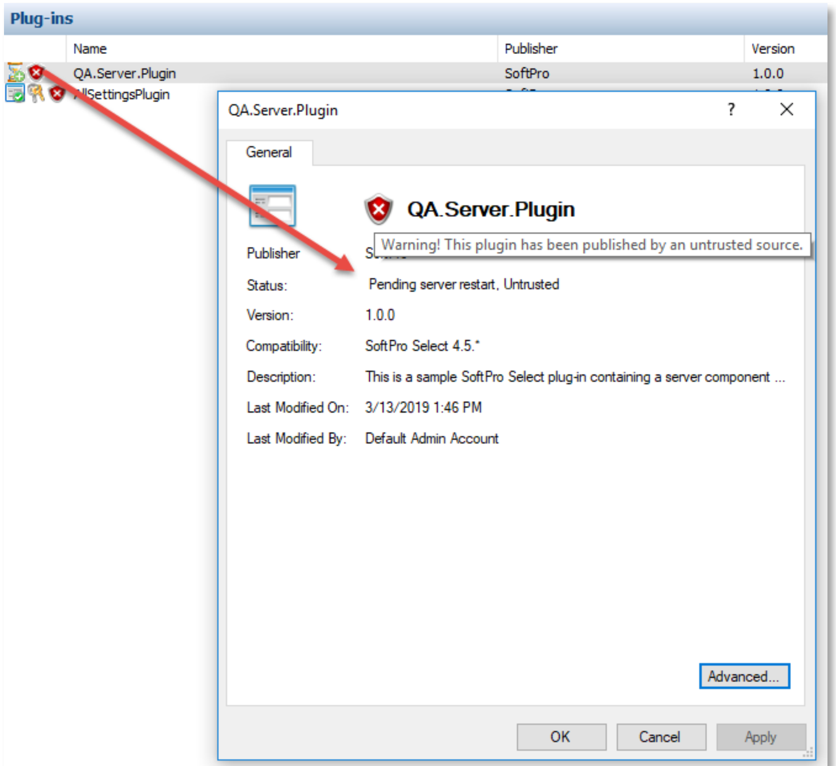
- When installing a plug-in that contains one or more server components, a warning message will display prior to installation.



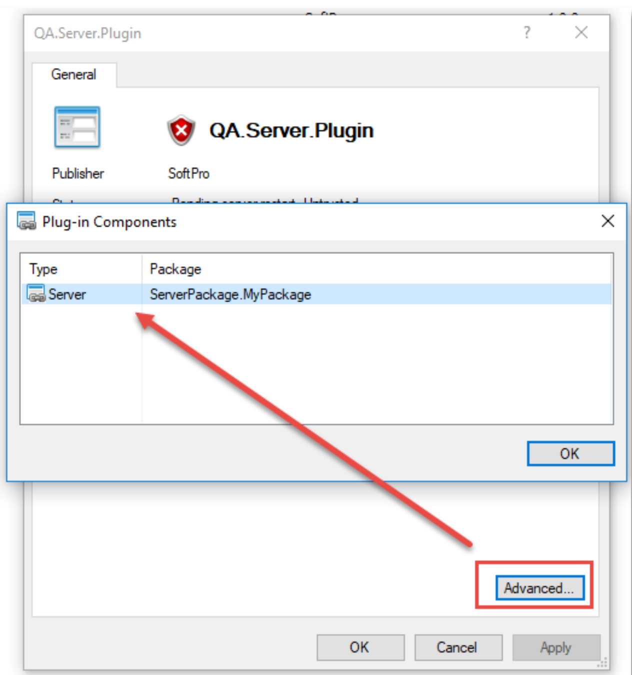
- After installation, the following dialog will open.



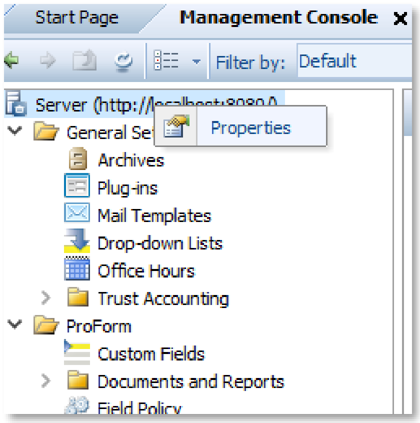
- The properties dialog for a plug-in that contains a server component will show a Status of 'Pending server restart' and if the plug-in was not signed by SoftPro it will also show 'Untrusted'. A plug-in can contain shell and server components, and will need to be restarted whenever there is a server component.



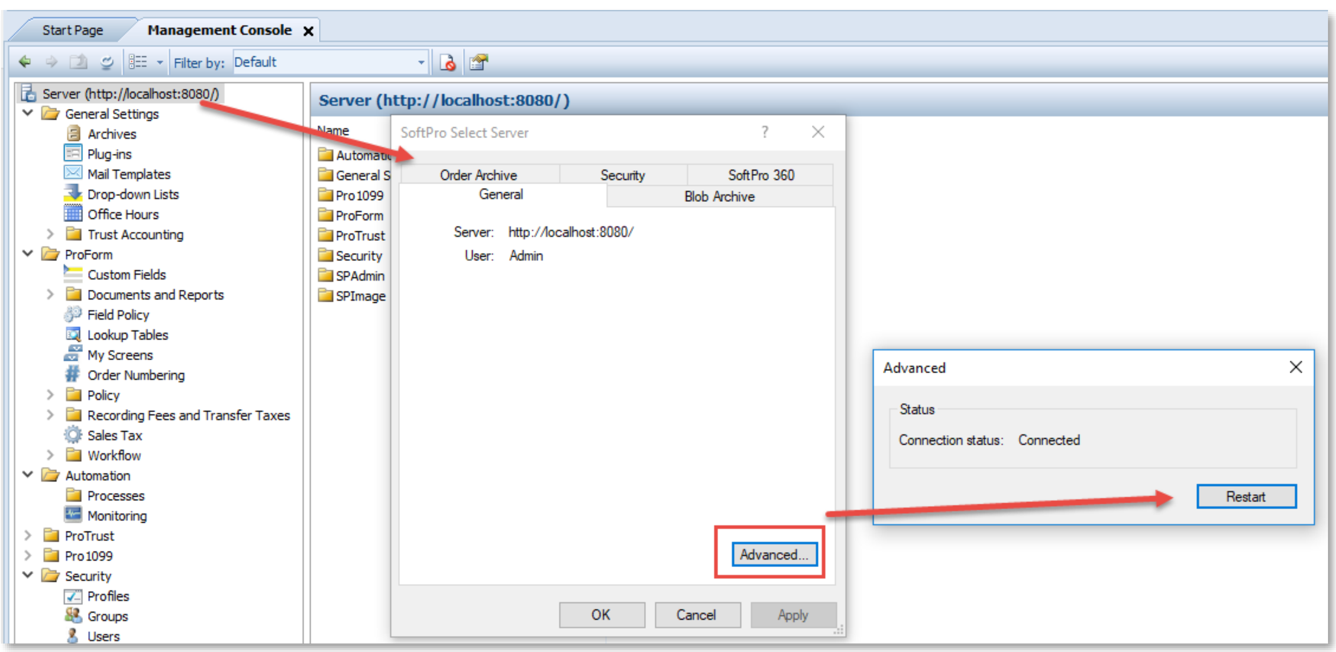
- Click the **Advanced** button to view details regarding the plug-in.



- To restart the server in SPAdmin, right-click on the Server and select **Properties**.



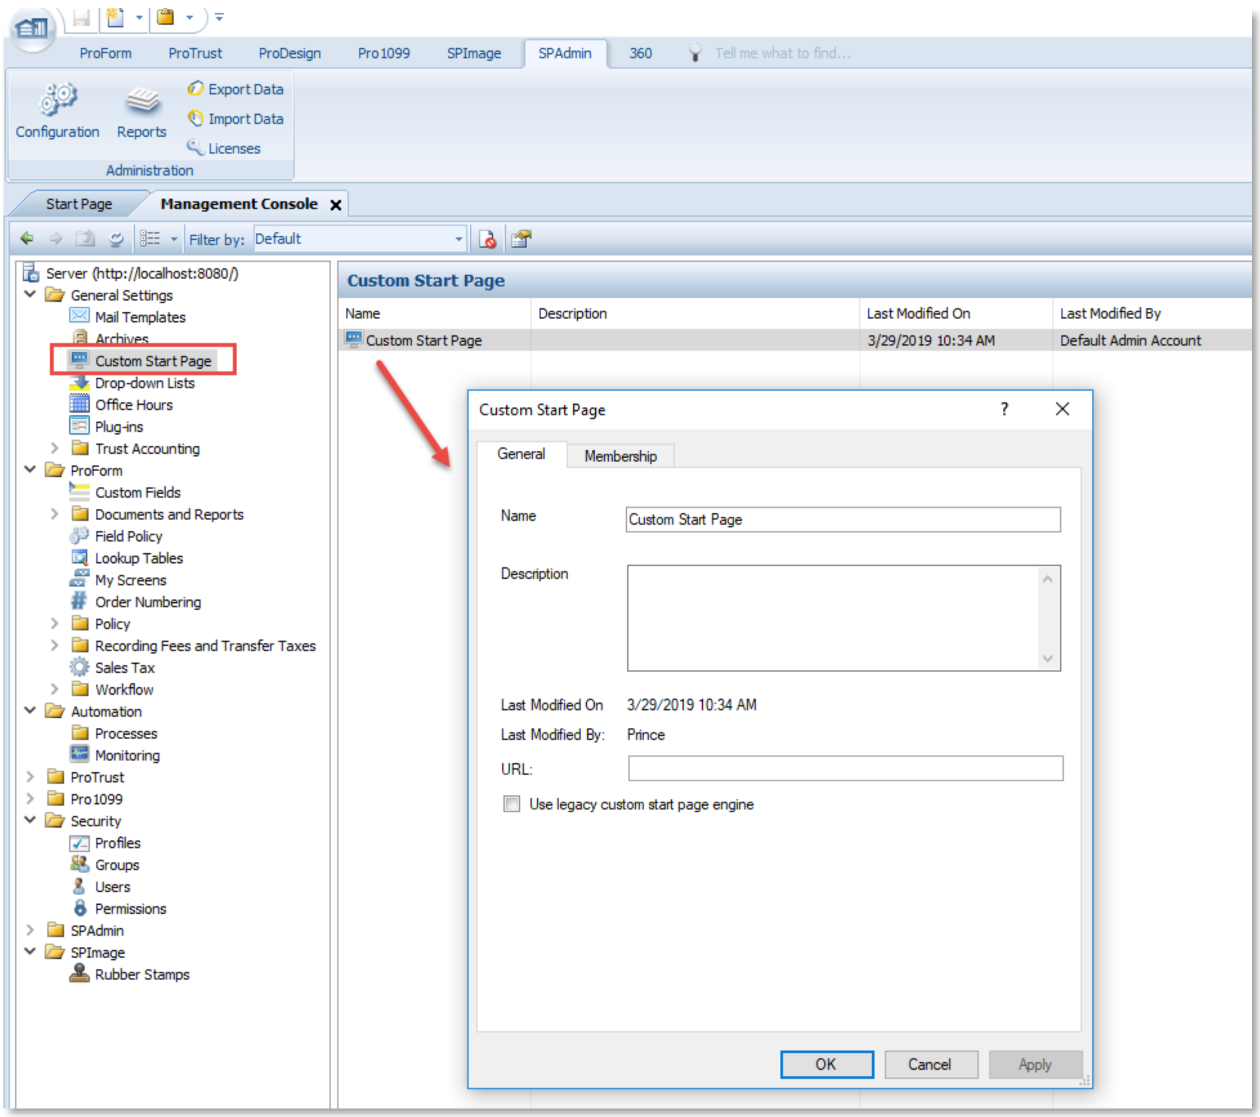
- On the General tab, click the **Advanced** button to restart the server. Once the server has been restarted, the plug-in will be available.



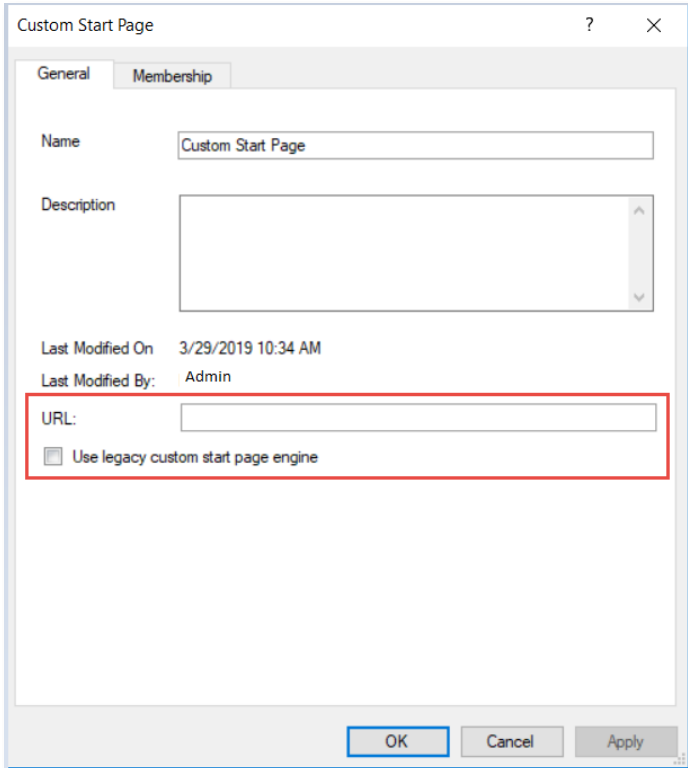
Custom Start Page Manager

For customers that have a *custom* start page, a new Custom Start Page Manager has been created. This is an optional screen and only needs to be used when a different Select start page is used.

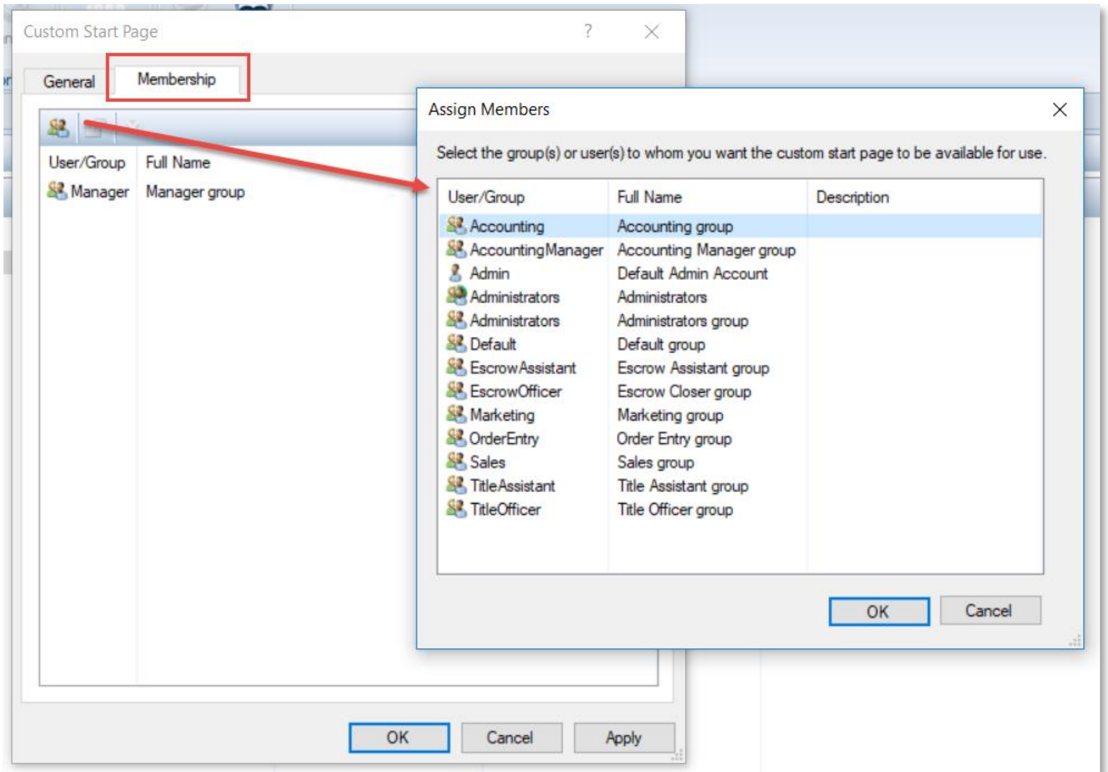
The new Custom Start Page Manager is located here:



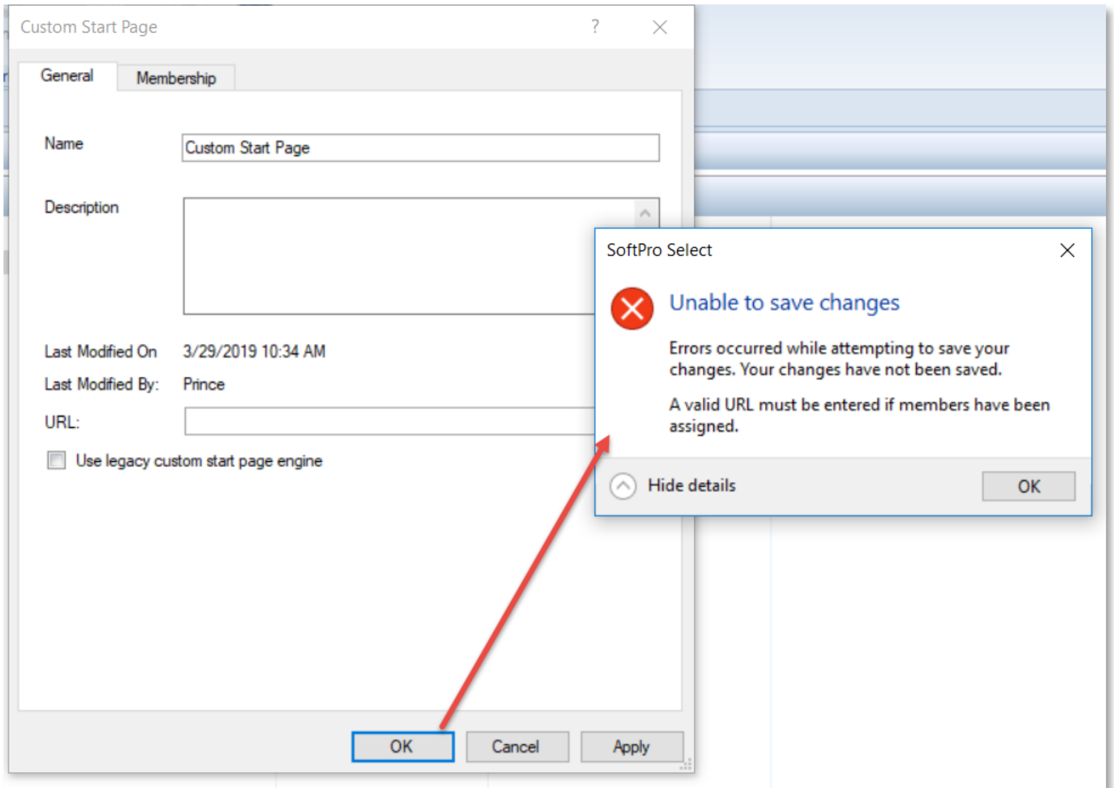
- When a different start page should display, the Admin should enter a URL for that page. This will replace the entire start page. The new start page engine is supported by a chromium browser. If the legacy custom start page engine should be used, select the **Use legacy custom start page engine** checkbox. This is only enabled when a URL is entered.



- When a custom URL is entered, only users/groups that have been assigned on the Membership tab will see the custom start page.



- If members have been assigned but no URL is entered, the Admin user will see the following error message:



- If a URL is entered but no members have been assigned, the user will see the following warning. The information could still be saved, however the custom start page will not display until members are assigned. Once members are assigned, only the members assigned will see the custom start page. All other users will see the 'out of the box' start page.

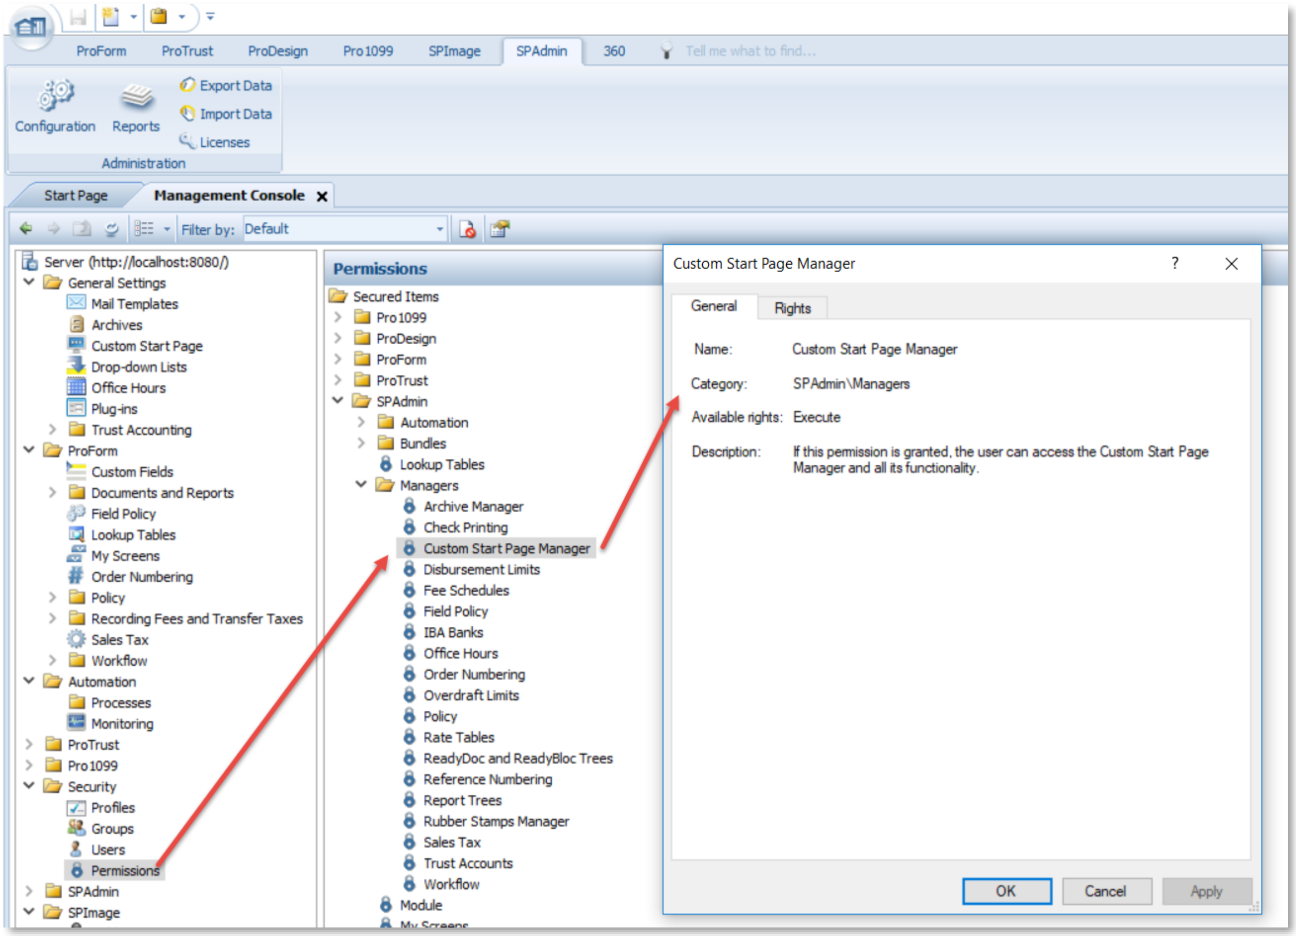
Custom Start Page Manager Permissions

There is a new permission for the Custom Start Page Manager, found here:



4.6.1 (6/24/19)

ProForm

Order

- After an upgrade to Select 4.6.0 from version 4.3.15.1, some users received error messages and were unable to open orders; *resolved*. *13756*
- The column headings were cutting off title headings on multi-line grids; *resolved*. *14209*

Documents & Attachments

- Some users were experiencing slowness during attachment-based operations; *resolved*. *14602*

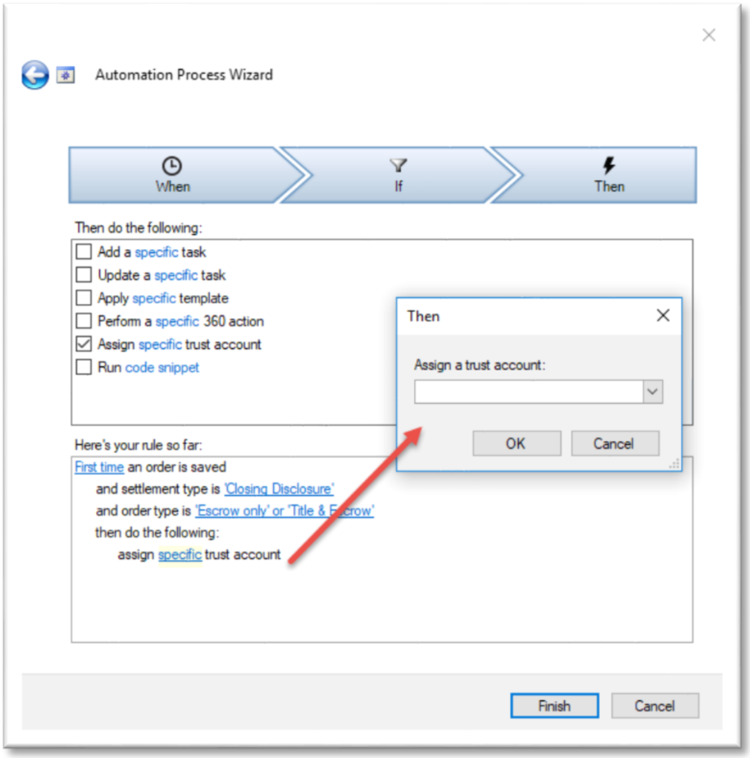
Work Automation

New enhancements have been added to the Automation features:

- You can now assign a specific trust account to an order.
- You can choose to send a notification email upon a process failure.

Assign a Specific Trust Account

- You can now select to assign a specific trust account to an order with a new action available in the Automation wizard. *429728*
- Click on the ***specific*** link to open a pop-up window to select the trust account.
- When the trigger and conditions are met, the specific trust account will be assigned.



Automation Process Wizard
When
If
Then
Then do the following:
Add a specific task
Update a specific task
Apply specific template
Perform a specific 360 action
Assign specific trust account
Run code snippet
Then
Assign a trust account:
OK
Cancel
Here's your rule so far:
First time an order is saved
and settlement type is 'Closing Disclosure'
and order type is 'Escrow only' or 'Title & Escrow'
then do the following:
assign specific trust account
Finish
Cancel

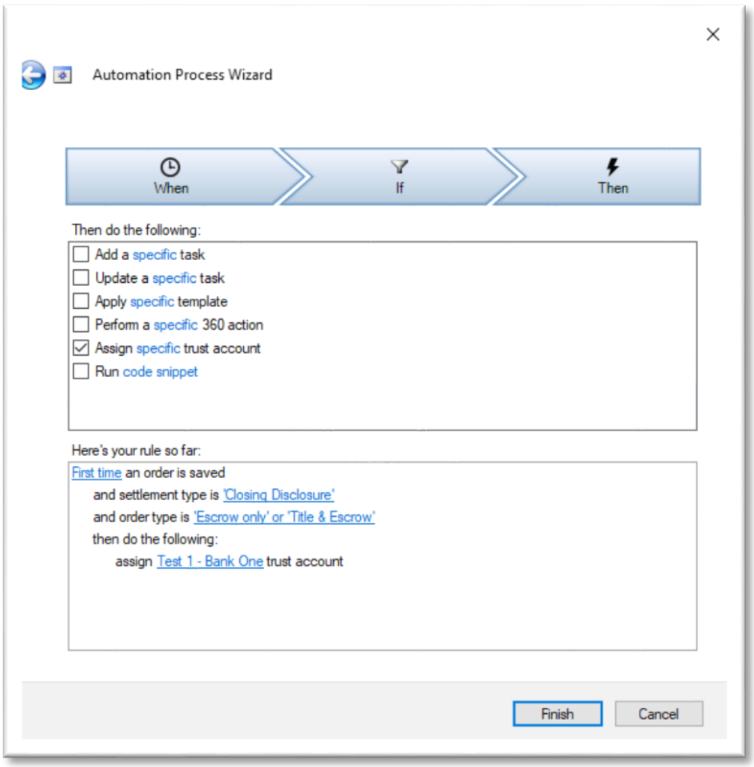
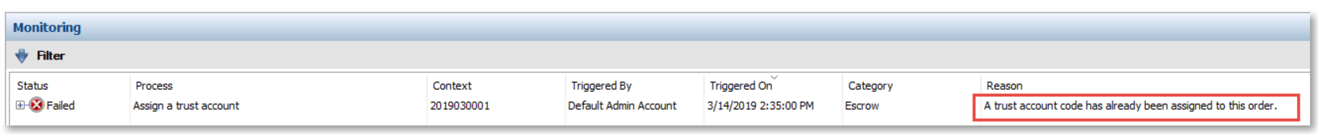
If
Then
Then do the following:
Add a specific task
Update a specific task
Apply specific template
Perform a specific 360 action
Assign specific trust account
Run code snippet
Then
Assign a trust account:
Code
BankName
Description
Test 1
Bank One
Test 2
Bank Two
Here's your rule so far:
First time an order is saved
and settlement type is 'Closing Disclosure'
and order type is 'Escrow only' or 'Title & Escrow'
then do the following:
assign specific trust account
Finish
Cancel



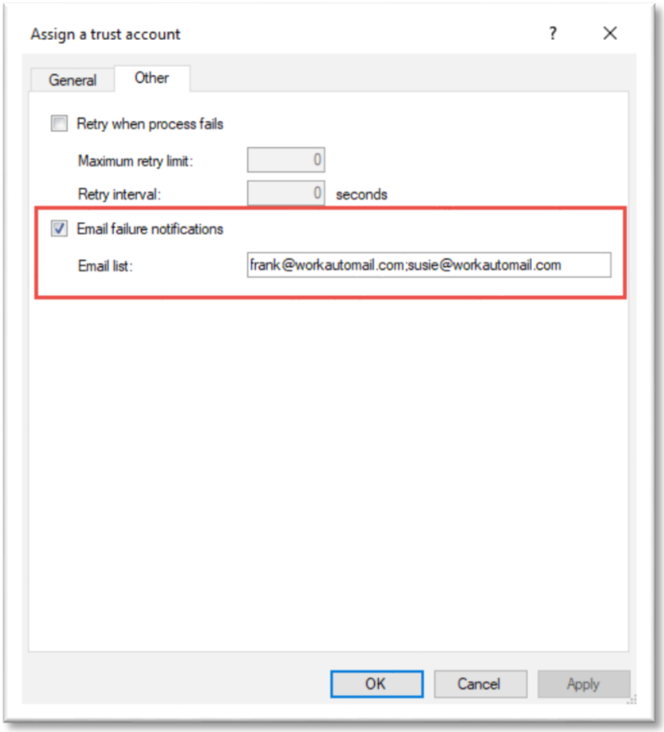
- If a trust account already exists in the order, the process will fail and the error message will indicate the reason: “A trust account has already been assigned to this order.”

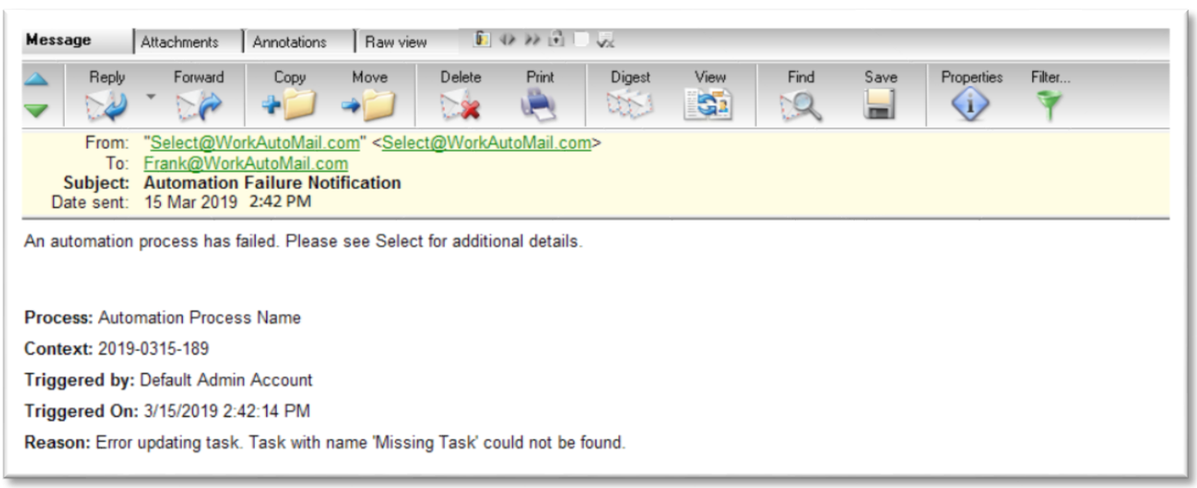


Email Notification when an Automation Process Fails

You now have the ability to set an option on the automation wizard to send an email when an automation process fails.

- On the Properties dialog > Other tab, an Admin can set the option to send an email notification when the process fails.
- Check the **Email failure notifications** checkbox to enable the **Email list** field.
- Enter one or more email addresses.
- Multiple email addresses should be separated by a semi-colon with no spaces between the semi-colon and email address, as shown below.





- Email notifications will need STMP settings configured for this feature to work. This can be configured during install or in the Select Server Properties dialog.

Pro1099

- When upgrading to Select 4.6.0 from version 4.3.15.1, the 1099 Reports were missing; *resolved*. *13738*

SPAdmin

- When attempting to close a premium or discount rate table dialog or fee schedule dialog, Select would stop working; *resolved*. *13998*

Plug-ins

- **Added support for shared assemblies across Shell packages in the same plug-in.**

  There was a need to consume implementation of a service interface that is defined in a shared assembly referenced by multiple package project. The plugin infrastructure was changed to support this requirement.

- **Removed the "News Feed Synchronization" job and relevant artifacts from the system.**

  Removed the periodic server job that downloads news feed data from http://www.softprocorp.com/app/spnet/v4.6/news.xml and puts it into a database table.

  The news section on the new dashboard/start page points to this website: http://selectstartpage.softprocorp.com and no longer reads from the new feed database table.

  If 3rd parties have a news section widget on their custom start page that point to the old site, they have the option of writing a custom job handler through a Server plug-in and can code it to pull news data from any source.

4.6.2 (8/14/19)

- Some users in a large environment who upgraded from certain 4.3 versions to 4.6.1, experienced system deadlocks when querying to update or remove a conversation; *resolved*. *16578*

4.6.3 (9/20/19)

ProForm

Order

General

- The Property screen was not loading in upgraded orders created with Select version 4.5.0; *resolved*. *19035*

SPAdmin

Automation

- New 360 Automation processes were not being activated, resulting in an error message; *resolved*. *19696*

4.6.4 (10/11/19)

This was an internal release only.

- An error was occurring upon upgrading to version 4.6.1 and when the installation package contained multiple plug-ins; *resolved*. *14592*

4.6.5 (12/16/19)

ProForm

Order

- The Order Lock Status field remained enabled when the edit and access permissions were set to *deny*; *resolved*. 11835
- A POC debit entered in the 500 section was reducing the "Total cash to sellers" total on the Sellers Proceeds & 1099-S screen. If any proceeds were diverted to a HUD line, the POC amounts were calculated as "Cash to Seller"; *resolved*. 11796
- The Foreign country value in the drop-down was incorrectly listed as "Columbia" instead of "Colombia;" *resolved*. 11809
- The "For" column on payor grids is now enabled in most scenarios to allow you to select a single buyer or seller contact code. 10492
- Title premiums with a manually entered $0.00 can now be sent to an invoice. 11756
- CDF templates and orders where the aggregate adjustment charge line was on a line other than G.08 may not overlay properly into another order and sometimes resulted in an error; *resolved*. 10339
- When multiple users in the same order access the register and a change is made which affects the order, the refresh prompt that currently appears will refresh the register as well as the order. 23644

Title

- The "Premium to split" percentage was not calculating properly when the loan is equal to the sales price and when the loan is higher than the sales price; *resolved*. 13986
- The CDF section H charge line should default to "Optional" only when the fee is a borrower paid owner's policy; *resolved*. 11726

Documents and Reports

- Changes to Page 2 HUD Loan Charges 801 and 802 were not appearing on Documents; *resolved*. 482989
- The ALTA Settlement Statement should not display Seller information for 2nd and subsequent loans on purchase transaction types; *resolved*. 505073
- Buyer and Seller CDF was not pulling in the Deed and Mortgage recording description for Select versions 4.3.14.1 and 4.3.15.1; *resolved*. 518758
- When printing individual pages of the Seller CDF, an extra page was printing; *resolved*. 531583

- Tax forms 4506 and 4506T were updated to match the new March 2019 published version. *532016*

- The substring calculation for document initials was not rendering correctly for some user names in ReadyDocs; *resolved*. *11836*

- Added a new SPAdmin Report for Redirected Documents/ReadyBlocs. *537900*

Redirected Documents/ReadyBlocs

Document	Title	PC	Redirected to Document	Redirected to Title	Redirected to PC
Document Type: ReadyBloc					
H_CSS_HeaderBlankForCustom	H_CSS_HeaderBlankForCusto m		H_CSS_HeaderBlankForCustomTEST##	H_CSS_HeaderBlankForCusto mTEST	{{Order.CSSs}}
Document Type: ReadyDoc					
DOC_SSCORPD0269	Prelim-Commitment Product Enclosure Letter (Escrow)	{{Order.Contact}}	DOC_105064_pe1099Certification	1099 CERTIFICATION	{{Order.Seller}}

- A new SPAdmin Report is available that shows all documents or reports that are pinned in SPAdmin. *537901*

User Pinned Documents

Document	Title	PC	Pinned Version	Current Version
Document Type: ProForm Report				
DOC_150064_pctEscrowOrderLogReportCorp	Escrow Order Log Report		1	1
Document Type: ReadyDoc				
DOC_150064_crt_Deed_LeaseholdAssignment	Deed (Leasehold Assignment)	{{Order.Deed}}	1	1
DOC_SPUNR_Invoice	Invoice	{{Order.Invoice}}	1	3

- The ALTA Settlement Statement ReadyDoc reports have been converted to an HTML version. *547677*

- The Buyer and Sellers names on the ALTA Settlement Statement will now pull from the Name Long field so that the entire name will print on the document. *306019*

- The option to print the lender address in the header was added to the ReadyDocs – ALTA Settlement Statements. *328046*

- The 1986 letter-sized HUD was cutting off the right side of Pages 2 and 3 in preview mode and when printed; *resolved*. *360139*

- The HUD-1(86) Attachment page signatures and text on the right side of the document were being cut off; *resolved*. *544889*

- A new feature is available for the Single Ledger Balance, to have a Running Balance by Trust Accounting Date. *552884*

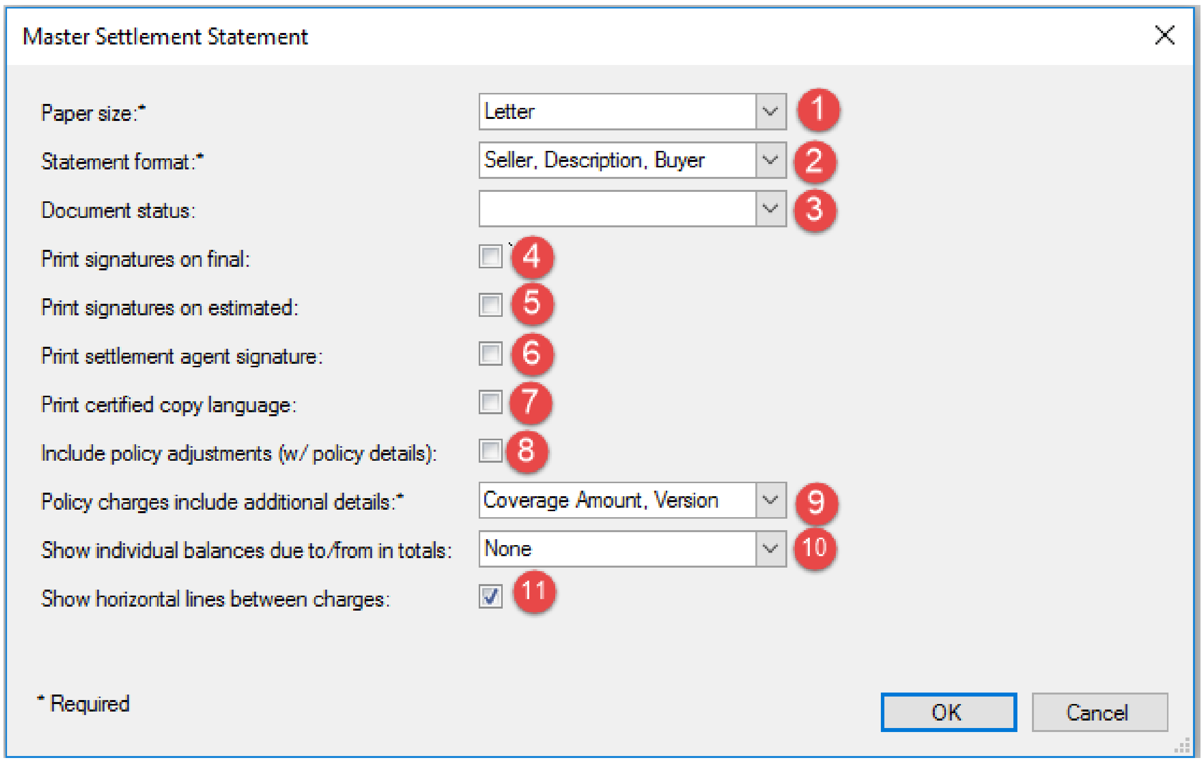
- The “? Questions” section was added as an option to print on the CDF Seller’s Statement. *556145*

SoftPro Commercial Settlement Statements

The commercial settlement statements have been replaced with HTML versions. The updated tree structure and details of the new enhancements are below.

Report Parameters

The report parameters have been updated to include additional enhancements. Parameter answers will now be saved to the order and become the defaulted value the next time the document is rendered.



1. Paper size: Users can print the statement using Letter or Legal size
2. Statement format: Existing formatting options and new options are now available
    a. Seller, Description Buyer
    b. Description, Buyer, Seller
    c. Description, Buyer, Seller (single column)
    d. Buyer, Seller separate sections
    e. Description, Buyer, Seller (credits/debits)
3. Document status: Existing status options Amended, Amended Estimated, Amended Final, Estimated, Final are available for selection
4. Print signatures on final: The option selected on the Statement Signatures & Footer screen will default here, and these parameters will be saved back to the field on the Statement Signatures & Footer screen.

5. Print signatures on estimated: The option selected on the Statement Signatures & Footer screen will default here. These parameters save back to the field on the Statement Signatures & Footer screen.
6. Print settlement agent signature: The option selected on the Statement Signatures & Footer screen will default here. These parameters save back to the field on the Statement Signatures & Footer screen.
7. Print certified copy language: Check this option to print certified copy language under the statement charges

ProTrust

- Some versions of Select would shut down when opening a transaction deposit that was created in the ProTrust ledger; *resolved*. 12644
- Receipts were remaining in the same state after moving a receipt and selecting Reload Receipts on the Group Deposits screen; *resolved*. 11801

- When the ProTrust accounting transaction date default of "use system date and time" option was selected and the system date and time transaction occurred after the end of business day, the transaction date would be adjusted to the next day; *resolved*. *12676*
- An error message appeared and prevented order save when Earnest Money deposit and Receipt were sent to the same line; *resolved*. *11797*
- Modifications to Order Contact wire instructions were not always updated on the pending transaction in the Register; *resolved*. *14674*

Pro1099

- Some users on versions 4.3.6 – 4.3.18 may have seen two 1099 reports appear in a tree titled, "Additional Default 1099 Reports." These reports will now be located in the Default tree after upgrading to 4.6.2. *17252*
  - The 1099 reports are:
    - Missing and Orphaned Records
    - Pro1099 vs ProForm Data Variance
  - After upgrading to 4.6.2 the "Additional Default 1099 Reports" tree is disabled.
  - These reports are part of the Default 1099 reports tree.

SPAdmin

- The Active Directory Sync Mass Users Save function was experiencing slowness when running operations with large numbers of users, and error messages occurred when attempting to save; resolved. *15079*
- Updates to State/Tax Stamp Managers in SPAdmin to retain the fee schedule version in the order even when a fee schedule has been modified to add or remove a state, county, or city. *22517*

4.6.6 (1/23/20)

- Downloaded plugins were not visible; Select was not completely removing the previous instance of shell plugins when in debug mode; *resolved*. 18136
- Plugins were not visible or were not working properly when multiple plugins referenced a common library; *resolved*. 28739

4.6.7 (1/31/20)

- The plugin button was not visible when installing new plugins; the registry was discovered to be the root cause; *resolved*. 29986
